a sub-fund of Vontobel Fund

This fund is managed by Vontobel Asset Management S.A., which is part of Vontobel Group.

This fund is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

This actively managed sub-fund aims to achieve positive returns over a period of three years, by maintaining a modest level of volatility, regardless of how the financial markets perform. It is categorized as Article 8 SFDR. More details can be found in the prospectus.

- The Sub-Fund invests at least two-thirds of its assets in fixed-income securities from companies with an investment grade rating. Out of its net assets, up to 20% may be invested in asset-backed securities and up to 20% in contingent convertible bonds (CoCo-Bonds). In adverse market conditions the Sub-Fund may hold up to 100% in securities issued or guaranteed by public, semi-public or supranational institutions along with money market instruments or cash. The Sub-Fund may not invest in other UCITS/UCIs.
- The sub-fund invests globally, with a focus on Europe. **Threshold:** The sub-fund invests at least 15% of its net assets in sustainable investments. **Main methodological limits:** Deficient ESG third-party data and internal analyses may result in inaccurate assessments of securities or issuers. Also, relevant ESG criteria may not be applied correctly and there may be indirect investment exposure to issuers

who do not meet the relevant criteria.

- Up to 33% of the Sub-Fund's assets may be invested outside of the aforementioned investment universe, in particular in fixed-income securities issued or guaranteed by government, government-related and supra-national issuers or in high yield bonds. It may also hold up to 20% of its net assets in bank deposits at sight.
- The sub-fund may use derivatives to achieve the investment objective and for hedging purposes.
- The Sub-Fund is not managed with reference to a benchmark. The portfolio manager has full investment discretion within the predefined investment limits.
- Income may be paid out every three months.
- Buying and selling securities entails transaction costs payable in addition to the charges listed.
- Redemption of shares: daily when banks in Luxembourg and in London are open for normal business (see prospectus for details and exceptions).
- AQN shares are reserved for specific investors and do not grant any rebate or retrocessions. See prospectus for details.

Risk and reward profile

The indicator above does not signal the risk of a potential loss, but indicates the fluctuations in the sub-fund's share price in the past.

- The share class is assigned to this category because its share price can fluctuate slightly due to the investment policy applied.
- The historical data used to calculate the profile cannot be used as a reliable guide to the future risk profile of the sub-fund.
- The risk category shown is not guaranteed and may change.
- Even the lowest risk category is not entirely free of risk.

When assigning a sub-fund's share class to a risk category, it may be the case that not all risks are taken into account. Such risks include

risks in connection with exceptional market events, operational errors, legal and political events. You can find a detailed list of the risks in the "Notice regarding special risks" section in the general part of the sales prospectus. The following risks have no direct influence on this category, but may still be important:

- Securities with a lower credit quality means a higher risk that an issuer may fail to meet its obligations. The investment value may fall if an issuer's credit rating is downgraded.
- Using derivatives generally creates leverage and entails valuation risks and operational risks. Leverage magnifies gains but also losses. Over-the-counter derivatives involve corresponding counterparty risks.
- Asset-backed securities and their underlying receivables are often intransparent. The sub-fund may also be subject to a higher credit and/or prepayment risk.
- CoCo-Bonds are associated with significant risks, including the risk of coupon payments being cancelled, capital structure inversion risk, and the risk of a CoCo-Bond's maturity being extended.
