EURO Corporate Bond

a sub-fund of Schroder International Selection Fund SICAV

Class C Distribution GBP (LU1323609526)

This fund is managed by Schroder Investment Management (Europe) S.A., which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth and income in excess of the ICE BofA Euro Corporate Index after fees have been deducted over a three to five year period by investing in bonds denominated in Euro issued by companies worldwide.

Investment policy

The fund is actively managed and invests at least two-thirds of its assets in bonds denominated in or hedged to euro issued by companies and other non-sovereign bond issuers, governments, government agencies and supranationals worldwide.

The fund may invest up to 30% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in bonds that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds); up to 20% of its assets in sovereign government bonds; up to 20% of its assets in asset-backed securities and mortgage-backed securities; and up to 20% of its assets in convertible bonds (including up to 10% of its assets in contingent convertible bonds). The fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash (subject to the restrictions provided in appendix I of the fund's prospectus).

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

Benchmark

The fund's performance should be assessed against its target benchmark being to exceed the ICE BofA Euro Corporate Index. The fund's investment universe is expected to overlap to a limited extent with the components of the target benchmark. However, the fund will likely reflect certain features of the target benchmark (namely credit quality/duration or exposure to particular issuers). The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the target benchmark. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund. Please see appendix III of the fund's prospectus for further details.

Other Information

The fund maintains a higher overall sustainability score than the ICE BofA Euro Corporate index, based on the investment manager's rating system.
The fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under “Sustainability-Related Disclosure” on the fund's webpage
https://www.schroders.com/en/lu/private-investor/gfc.

Dealing frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution policy

This share class pays a quarterly distribution at a fixed rate of 3% per annum of the value per share. The distribution policy is kept under review.

Risk and reward profile

Lower risk — Potentially lower reward

Higher risk — Potentially higher reward

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

ABS and MBS risk: The fund may invest in mortgage or asset-backed securities. The underlying borrowers of these securities may not be able to pay back the full amount that they owe, which may result in losses to the fund.

Contingent convertible bonds: The fund may invest in contingent convertible bonds which are bonds that convert to shares if the bond issuer's financial health deteriorates. A reduction in the financial strength of the issuer may result in losses to the fund.

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Contingent convertible bonds: The fund may invest in contingent convertible bonds which are bonds that convert to shares if the bond issuer's financial health deteriorates. A reduction in the financial strength of the issuer may result in losses to the fund.

Capital risk / Distribution policy: As the fund intends to pay dividends regardless of its performance, a dividend may represent a return of part of the amount you invested.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Sustainability risk: The fund has environmental and/or social characteristics. This means it may have limited exposure to some companies, industries or sectors and may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the investment manager. The fund may invest in companies that do not reflect the beliefs and values of any particular investor.

Credit risk: If a borrower of debt provided by the fund or a bond issuer experiences a decline in financial health, their ability to make payments of interest and principal may be affected, which may cause a decline in the value of the fund.

Currency risk: If the fund's investments are denominated in currencies different to the fund's base currency, the fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates. If the investor holds a share class in a different currency to the base currency of the fund, investors may be exposed to losses as a result of movements in currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used for investment purposes and/ or to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Emerging markets & frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Distribution costs risk: The level of distribution costs in certain jurisdictions may impact the ability of the investment manager to meet the fund's investment objective across all share classes after fees have been deducted.

High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk meaning greater uncertainty of returns.

Interest rate risk: The fund may lose value as a direct result of interest rate changes.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Charges

One-off charges taken before or after you invest	
Entry charge	1.00%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year	
Ongoing charges	0.63%

Charges taken from the fund under certain specific conditions
Performance fee
None

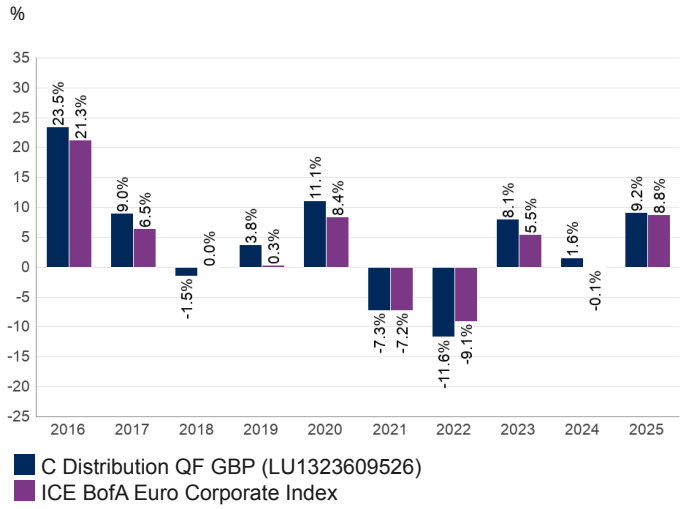
The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2025 and may vary from year to year.

You can find more information about the charges in Section 3 of the fund's prospectus.

Past performance



Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pound after the ongoing charges and the portfolio transaction costs have been paid. Entry charges are excluded from calculations of past performance.

The fund was launched on 30/06/2000.
The shareclass was launched on 02/12/2015.
Performance figures are only available since the launch of the respective share class.
