BNY Mellon Global Equity Income Fund

STERLING Z (INC.) (ISIN: IE00BKJ92K19)

a sub-fund of BNY Mellon Global Funds, plc. This Fund is managed by BNY Mellon Fund Management (Luxembourg) S.A.

Objectives and Investment Policy

OBJECTIVE

To generate annual distributions and to achieve long-term capital growth by investing predominantly in equity and equity-related global securities.

POLICY

The Fund will:

- invest anywhere in the world;
- invest in company shares and similar investments;
- invest in companies of all sizes (e.g. small, medium and large companies) and in any industry (e.g. pharmaceuticals, financials, etc);
- limit investment in other collective investment schemes to 10%;
- exclude direct investment in companies with material involvement in activities the Investment Manager deems harmful from an environmental and/or social perspective e.g., tobacco production. All companies in which investments are made follow good governance practices; and
- promote environmental and social characteristics pursuant to Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR").

The Fund may:

- invest in emerging markets; and
- invest in derivatives (financial instruments whose value is derived from other assets) to help achieve the Fund's investment objective.

The Fund will also use derivatives with the aim of risk or cost reduction or to generate additional capital or income.

Benchmark: The Fund will measure its performance against the FTSE World TR Index (the "Benchmark").

However, as the Fund will typically purchase company shares that meet minimum yield thresholds, the Fund performance may differ from and, in certain conditions, underperform the Benchmark.

The Fund is actively managed, which means the Investment Manager has absolute discretion to invest outside the Benchmark subject to the investment objective and policies disclosed in the Prospectus. While the Fund's holdings may include constituents of the Benchmark, the selection of investments and their weightings in the portfolio are not influenced by the Benchmark. The investment strategy does not restrict the extent to which the Investment Manager may deviate from the Benchmark.

OTHER INFORMATION

Treatment of income: income generated will be paid to shareholders quarterly on or before 11 February, 11 May, 11 August and 11 November.

Dealing: you can buy and sell your shares in the Fund between 9:00 and 17:00 (Irish Time) on each day which is a business day in Ireland and the U.S. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is GBP 200,000,000.

The Fund is not subject to the UK sustainable investment labelling and disclosure requirements.

Risk and Reward Profile

We have calculated the risk and reward indicator, as shown above. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility). It is not a guide to the future risk and reward rating of the Fund. The rating shown is not a target or guarantee and may shift over time. Even the lowest rating of 1 does not mean a risk-free investment.

This Fund is rated 5 because its historical value has shown moderately high volatility. With a Fund rating of 5, you have a moderately high risk of losing money but your chance for gains is also moderately high.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

Geographic Concentration Risk: Where the Fund invests significantly in a single market, this may have a material impact on the value of the Fund.

Objective/Performance Risk: There is no guarantee that the Fund will achieve its objectives.

Derivatives Risk: Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.

Charges to Capital Risk: The Fund takes its charges from the capital of the Fund. Investors should be aware that this has the effect of lowering the capital value of your investment and limiting the potential for future capital growth. On redemption, you may not receive back the full amount you initially invested.

Share Class Currency Risk: This share class is denominated in a different currency from the base currency of the Fund. Changes in the exchange rate between the share class currency and the base currency may affect the value of your investment.

Environmental, Social and Governance (ESG) Investment Approach Risk: The Fund follows an ESG investment approach. This means factors other than financial performance are considered as part of the investment process. This carries the risk that the Fund's performance may be negatively impacted due to restrictions placed on its exposure to certain sectors or types of investments. The approach taken may not reflect the opinions of any particular investor. In addition, in following an ESG investment approach, the Fund is dependent upon information and data from third parties (which may include providers for research reports, screenings, ratings and/or analysis such as index providers and consultants). Such information or data may be incomplete, inaccurate or inconsistent.

Counterparty Risk: The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

Currency Risk: This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.

Emerging Markets Risk: Emerging Markets have additional risks due to less-developed market practices.

Market Capitalisation Risk: Investments in the securities of small to medium-sized companies (by market capitalisation) may be riskier and less liquid (i.e. harder to sell) than large companies. This means that their share prices may have greater fluctuations.

Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect ("Stock Connect") Risk: The Fund may invest in

China A shares through Stock Connect programmes. These may be subject to regulatory changes and quota limitations. An operational constraint such as a suspension in trading could negatively affect the Fund's ability to achieve its investment objective.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".
