

## Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

# IFSL Rockhold Global Equity Fund

A Sub-fund of the IFSL Rockhold OEIC (ISIN Accumulation: GB00BNM3D752)

This Fund is managed by Investment Fund Services Limited (IFSL)

## Objectives and Investment Policy

The aim of the Fund is to increase the value of an investment over a minimum of 5 years. The Fund will do this through a combination of income received by the Fund, which is money paid out of investments, such as dividends from shares, and capital growth, which is profit on investments held.

The Investment Manager actively manages the Fund, deciding which investments to buy or sell, and when, and will invest at least 80% in other collective investment schemes, investment trusts and exchange traded funds (collectively "Investment Funds"). This could include other Investment Funds managed by the Authorised Corporate Director, Sub-Investment Manager or the Investment Manager.

Through these underlying Investment Funds, the Fund will have exposure to at least 80% in shares of companies.

In addition, the underlying Investment Funds may also hold other permitted investments such as bonds, money market instruments, and commodities, such as gold, although this is expected to be minimal.

The Fund may hold up to 20% in cash.

Whilst the Fund itself will not use derivatives, the underlying Investment Funds purchased may have the ability to use derivatives to varying degrees.

The Fund has been designed to be held alongside the other fund of the IFSL Rockhold OEIC to construct portfolios with a range of risk profiles.

The Fund is structured in a way that it will typically maintain a high-risk rating, as it will have exposure to at least 80% of the Fund in shares of companies which are considered high risk asset types. The Investment Manager monitors this on a quarterly basis by reviewing the expected volatility (a measure of the size of short-term changes in the value of an investment) of the Fund. If required, the Investment Manager may request that the Sub-Investment Manager adjusts the level of expected volatility within the portfolio, to assist in the construction of risk profiles whilst at the same time maintaining a high-risk rating.

The Sub-Investment Manager will analyse market trends in the Fund's sector and takes tactical decisions based on their views of economic and market conditions, to determine appropriate weightings of the asset classes outlined within the investment policy, and their sub-categories, such as geographic location; whilst ensuring that the risk profile of the Fund meets the intended risk classification.

The Investment Association (IA) groups funds into sectors based on similar characteristics. The Fund's investment policy puts it in the IA Global sector. The Fund is not managed to a benchmark, however you may want to assess the Fund's performance compared to the performance of this sector.

Income is not distributed but is rolled up (accumulated) into the value of your investment.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

## Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund may be exposed to the shares of smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions.

The Fund may be exposed to emerging markets, which are typically riskier than more established markets, as they can involve a higher than average risk due to the volatility of currency exchange rates, limited geographic focus, investment in a smaller number of issues, political and economic instability and less liquid markets. Difficulty in trading may arise, resulting in a negative impact on your investment.

The Fund may be exposed to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality.

The Fund will have exposure to overseas markets, either directly or indirectly, and is therefore exposed to currency risk. As a result, the value of your investment can be affected by changes in exchange rates.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 30/09/2024. The OCF figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Sections 25-27 of the Fund's Prospectus, which is available at [www.ifslfunds.com](http://www.ifslfunds.com).

### One-off charges taken before or after you invest

<b>Entry Charge</b>	0.00%
<b>Exit Charge</b>	None

This is the maximum that might be taken out of your money before it is invested.

### Charges taken from the fund over each year

<b>Ongoing Charges</b>	0.75%
------------------------	-------

### Charges taken from the fund under certain conditions

<b>Performance Fee</b>	None
------------------------	------

## Past Performance

### Historic performance to 31 December 2024

	2020	2021	2022	2023	2024
■ Fund	–	–	-9.1	13.3	15.8
■ Benchmark	–	–	-11.3	12.7	12.8

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up.

Performance returns are based on the net asset value with distributable income reinvested and takes account of all ongoing charges, but not entry and exit charges. The past performance of this share class is calculated in GBP.

The Fund was launched on 18 October 2021

This share class was launched on 18 October 2021.

Benchmark: IA Global.
