The Company is managed by PGIM Investments (Ireland) Limited, part of the PGIM group of companies.

Objectives and Investment Policy

The Fund seeks long-term capital appreciation. There can be no assurance that the investment objective will be achieved. The Fund will seek to achieve its investment objective by investing in equity and equity-related securities of companies located around the world that the Sub-Investment Manager believes are involved in activities that will reduce global carbon emissions and aid in the shift to a cleaner, more reliable and affordable energy future, including companies providing power and energy solutions that address the challenge of meeting rising global energy demand.

The benchmark of the Fund is the MSCI ACWI IMI (All Country World Investable Market Index) (the "Benchmark"); however, the Sub-Investment Manager has discretion over the investments of the Fund. The Fund will be actively managed and does not intend to track the Benchmark. The Benchmark is being used by the Fund for performance comparison purposes only.

The Sub-Investment Manager looks for companies that it believes contribute towards the clean energy transition through areas such as fuel decarbonisation, carbon capture and storage, electrification, power generation and distribution, renewables, infrastructure modernisation, and energy efficiency. The Fund may invest in companies that the Sub-Investment Manager believes will support improved sustainability practices over time, such as natural gas companies.

Although the Fund promotes a sustainability characteristic, it does not have sustainable investment as its investment objective.

It is not currently anticipated that dividends will be declared in respect of the Class. Net investment income attributable to the Class is expected to be retained by the Fund, which will increase the net asset value per share of the Class.
