The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

FTGF Brandywine Global Fixed Income Fund

Class X GBP ACC • ISIN IE00BSZLQJ44
A subfund of: Franklin Templeton Global Funds plc (the "Company")
Managed by: Franklin Templeton International Services S.à r.l., part of the Franklin Templeton group of companies.

Objectives and Investment Policy

FTGF Brandywine Global Fixed Income Fund (the "**Fund**") investment objective is to seek to maximise income and growth of capital (total return).

Investment Policy

The Fund mainly invests in investment grade (or comparable) government bonds issued in developed markets (according to the Benchmark) and denominated in, or hedged to, USD. These investments may be from anywhere in the world.

To a lesser extent, the fund may invest in emerging markets (according to the JP Morgan GBI-EM Global Diversified Index).

Derivatives and techniques The Fund may use derivatives for reducing risks (hedging) and costs, and to generate additional income or growth.

Strategy The investment manager uses macroeconomic, interest rate and credit analysis to identify securities that appear to offer the best return for their risk level and operates a value approach to global bond markets. The investment manager may take both long and short positions on individual securities and currencies, buying those it appears will increase in price and taking short positions on those it appears will decline in price.

SFDR category Article 8 (promotes environmental and/or social characteristics under EU regulations).

The Investment Manager applies a proprietary rating methodology using various ESG criteria to assess long-term opportunities and risks. The Fund removes the lowest rated issuers from the investment universe and excludes or restricts investments in certain industries that are harmful to the environment or society, such as thermal coal, weapons and tobacco.

Base currency US dollar (USD).

Benchmark(s) FTSE World Government Bond Index (USD Hedged). Used for performance comparison. The benchmark plus 1.5% per annum is also used as a performance target (gross of fees) over a complete economic cycle.

The Fund is actively managed and may deviate materially from that of the benchmark(s).

Buying and selling shares

You may normally buy or sell shares on any day the New York Stock Exchange is open for business.

Intended retail investor

Investors who understand the risks of the Fund and plan to invest for at least 5 years. The Fund may appeal to investors who:

• are looking for a combination of income and investment growth

• are interested in exposure to global bond markets as part of a diversified portfolio

• have a medium risk profile and can tolerate moderate short-term changes in the share price

Product availability The Fund is available to all investors with at least basic investment knowledge, through a wide range of distribution channels, with or without the need for advice.

Terms to Understand

bonds, investment grade: Bonds represent an obligation to repay a debt, along with interest. Investment grade bonds are considered to have a lower risk of becoming unable to make promised payments to investors, including the initial debt.

derivatives: Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

emerging markets: Markets of less economically developed nations, such as some nations in Asia, Africa, Eastern Europe and Latin America.

Share Class Currency: GBP

Treatment of Income: Income and gains from the fund's investments are not paid but instead are reflected in the fund's share price.

Risk and Reward Profile

What does this indicator mean and what are its limits?

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The Fund invests mainly in a diversified portfolio of bonds from various countries and sectors, along with exposure to various currencies. As a result, the performance of the Fund can fluctuate over time.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Bonds: There is a risk that issuers of bonds held by the fund may not be able to repay the investment or pay the interest due on it, leading to losses for the fund. Bond values are affected by the market's view of the above risk, and by changes in interest rates and inflation.
Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.
Derivatives: The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.
Fund counterparties: The fund may suffer losses if the parties that it trades with cannot meet their financial obligations.
Fund currency: Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it.
Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.
Interest rates: Changes in interest rates may negatively affect the value of the fund. Typically as interest rates rise, bond values fall.
Liquidity: In certain circumstances it may be difficult to sell the fund's investments because there may not be enough demand for them in the markets, in which case the fund may not be able to minimise a loss on such investments.
Sustainability: The fund's integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the fund and may also cause the fund to sell investments that will continue to perform well. A sustainability risk could materialise due to an environmental, social or governance event or condition which may impact the fund's investments and negatively affect the returns of the fund.
Class currency: The value of your investment may fall due to changes in the exchange rate between the currency of your share class and the base currency of the fund.
For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	none
Exit charge	none
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the Fund over a year	
Ongoing charge	0.88%
Charges taken from the Fund under certain specific conditions	
Performance fee	none

Entry and exit charges shown are the maximum that might be taken out of your money. In some cases, you might pay less and you should speak to your financial adviser about this.

The ongoing charge is based on expenses for the 12 month period ending December 2025. This figure may vary over time.

For more information about charges, please see the "Fees and Expenses" sections of the base prospectus and fund supplement.
