Lazard Global Equity Income Fund C Acc GBP

Lazard Global Equity Income Fund is a sub-fund of Lazard Investment Funds (the "UCITS")

ISIN: GB00B7VB8X97

This Fund is managed by Lazard Fund Managers Limited, part of the Lazard Group

Objectives and Investment Policy

Lazard Global Equity Income Fund (the "Fund") aims to outperform the MSCI All Country World Index (the "Benchmark"), while generating income, over at least 5 years.

The Fund is actively managed and will invest at least 70% of its value in global equities (i.e. shares) and equity related securities, including common and preferred stock and depositary receipts. Leveraging Lazard's quantitative advantage team's research capabilities and stock selection process, the Sub-Fund will consider four key criteria of a company's attractiveness: its valuation relative to peers; its sentiment in the market; an evaluation of how much growth it is likely to achieve; and the quality of its business. Companies selected for the Sub-Fund may exhibit any one or more these criteria. In addition, the Sub-Fund will incorporate the likelihood of the company to distribute dividends.

The Fund's investments will typically consist of holdings in companies having greater than US$300 million (or relevant currency equivalent) in market capitalisation with liquid quoted securities.

The Fund may also invest in units or shares of other investment funds (including exchange traded funds, other sub-funds of the UCITS and/or other funds managed by the Lazard Group).

The Fund may invest in cash and in investments that are deemed to be nearly equivalent to cash at any time and to the extent considered appropriate in light of market conditions.

The Fund may use derivatives (which are financial contracts whose value is linked to the price of an underlying investment) for the purposes of efficient portfolio management.

You can buy or sell shares in the Fund on any day on which the stock exchange in London is open for business.

The Fund has discretion as to which investments it will hold within the limits of the Investment Objective and Policy.

Income and profits, if any, attributable to your shares will not be paid out as a dividend but will be accumulated in the Fund on your behalf and reflected in an increase in the value of your holdings.

The Fund's performance is measured against the performance of the Benchmark which the Investment Manager has assessed to be the most appropriate Benchmark for targeting performance. The performance of the Fund seeks to match or exceed the Benchmark performance. The Fund is not constrained by the Benchmark as it has flexibility to invest in securities and asset classes not included in the Benchmark.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within a short period of time.

Risk and Reward Profile

The risk and reward categories above are calculated using historic data and may not be a reliable indicator of the Fund's future risk profile. The risk and reward category may shift over time and is not a target or guarantee.
The lowest category (i.e. category 1) does not mean "risk free".

The risk rating of this share class is calculated on the basis of historic volatility – i.e. how much the value of the underlying assets of the Fund has fluctuated over the last 5 years.

This share class has been placed in the risk category stated above, because based on the historic data, the underlying assets within the Fund have shown moderately high volatility.

Please note, there are other risks that may not be reflected in the risk and reward categories above. Some of these risks are summarised below.

- There is no capital guarantee or protection of the value of the Fund. The value of your investment and the income from it can go down as well as up and you may not get back the amount you originally invested.
- The Fund's high yielding assets may carry a greater risk of capital values falling or have limited prospects of capital growth or recovery.
- This Fund may invest in the securities of emerging markets. These markets may be less developed than others and so there is a greater risk that the Fund may experience greater volatility, delays in buying, selling and claiming ownership of its investments. Emerging markets may also have less developed political, economic and legal systems and there is a higher risk that the Fund may not get back its money.
- The Fund may invest in units or shares of other investment funds. Such other funds may themselves be subject to their own fees and expenses.
- The annual management charge is deducted from the capital of the Fund. This may increase the amount of income available for distribution from the Fund but may constrain or erode potential for capital growth.
- The returns from your investment may be affected by changes in the exchange rate between the Fund's base currency, the currency of the Fund's investments, your share class and your home currency.

See "Risk Factors" in the UCITS' Prospectus for more information about risks.
