

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Invesco Multi-Sector Credit Fund (the "Fund") A sub-fund of Invesco Funds (the "Umbrella Fund") Class C accumulation - EUR (ISIN: LU0102737490) (the "Share Class")

The Fund is managed by Invesco Management S.A., part of the Invesco Group.

Objectives and Investment Policy

- The objective of the Fund is to provide a positive total return over a full market cycle.
- The Fund seeks to achieve its objective through an active strategic and tactical asset allocation process to credit-related debt instruments globally.
- The Fund intends to gain exposure to debt instruments including but not limited to investment grade (higher quality) and non-investment grade (lower quality with a minimum rating of B- by Standard and Poor's rating agency or equivalent) debt instruments, including debt instruments which are in financial distress (distressed securities).
- The Fund may also gain exposure to securitised debt (with a minimum rating of B- by Standard and Poor's rating agency or equivalent) and to the loans market through derivatives and other eligible complex instruments.
- The Fund may make significant use of derivatives (complex instruments) in order to (i) reduce the risk and/or generate additional capital or income and/or (ii) meet the Fund's investment objectives by generating varying amounts of leverage (i.e. where the Fund gains market exposure in excess of the net asset value of the Fund).
- The Fund may use securities lending for efficient portfolio management purposes.
- The Fund is actively managed without reference or constraint relative to a benchmark.
- The Fund promotes environmental, social and governance (ESG) criteria as covered under Article 8 of the Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector.
- You can buy and sell shares in the Fund on any Dealing Day (as defined in the Prospectus).
- Any income from your investment will be reinvested.

Risk and Reward Profile

Lower Risk ← Higher Risk
Typically lower rewards ← Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Share Class is in risk category 3 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- The Fund may hold a large amount of Asset Backed Securities (ABS) (complex instruments) as well as other lower quality debt securities which may impact the liquidity of the Fund under certain circumstances.
- The Fund may use Bond Connect to access Renminbi instruments traded in Mainland China. This may result in additional liquidity risk and operational risks including settlement and default risks, regulatory risk and system failure risk.
- Changes in interest rates will result in fluctuations in the value of the Fund.
- Debt instruments are exposed to credit risk which is the ability of the borrower to repay the interest and capital on the redemption date.
- The Fund may invest in distressed securities which carry a significant risk of capital loss.
- The lack of common standards may result in different approaches to setting and achieving ESG objectives. In addition, the respect of the ESG criteria may cause the Fund to forego certain investment opportunities.
- The Fund may use derivatives (complex instruments) for investment purposes which may result in the Fund being significantly leveraged and may result in large fluctuations in the value of the Fund. The use of derivatives transactions may expose the Fund to counterparty risks that may result in losses to the Fund associated with the bankruptcy or insolvency of a counterparty.
- The Fund may invest in a dynamic way across assets/asset classes, which may result in periodic changes in the risk profile, underperformance and/or higher transaction costs.
- Investments in debt instruments which are of lower credit quality may result in large fluctuations in the value of the Fund.
- As a portion of the Fund may be exposed to less developed countries, you should be prepared to accept large fluctuations in the value of the Fund.
- It may be difficult for the Fund to buy or sell certain instruments in stressed market conditions. Consequently the price obtained when selling such instruments may be lower than under normal market conditions.
- A more detailed description of risk factors that apply to this Fund is set out in Section 8 of the Prospectus.
