AuAg ESG Gold Mining UCITS ETF - Accumulating (the Fund)

ISIN: IE00BNTVVR89

A sub-fund of HANetf ICAV. Managed by HANetf Management Limited (the **Manager**)

Objectives and Investment Policy

The Fund seeks to track the price and yield performance, before fees and expenses, of the Solactive AuAg ESG Gold Mining Index (the **Index**).

Index: The Index is governed by a published, rules-based methodology and is designed to measure the performance of a global investable universe of publicly listed companies that generate their revenues from the gold mining industry which includes drilling, geological assessment, financing, development, extraction, initial refinement and delivery of gold ore.

Eligibility: To be eligible for inclusion in the Index, companies must meet the following criteria:

- must be classified in one of the following industries or subindustries according to the FactSet Revere Business Industry Classification System (RBICS); Americas Gold Mining; Other Gold Mining; Asia/Pacific Gold Mining; Other Precious Metal Ore Mining; Silver Ore Mining
- must comply with the principles of the UN Global Compact
- meet the minimum market capitalisation and liquidity requirements;
- be listed on one of the exchanges as listed in the Supplement.

The remaining companies are then ranked by their ESG risk score in ascending order (highest to lowest). To calculate the ESG risk rating of each company the Data Provider (Sustainalytics) takes into consideration the corporate governance and material ESG issues as described in the Supplement. The ESG risk ratings

measure the degree to which a company's economic value is at risk driven by ESG factors i.e.

the magnitude of a company's unmanaged ESG risks.

A minimum of 20 companies and up to a maximum of 25 companies, comprising the top 70% of the Index universe with the lowest ESG risk score, are then selected for inclusion in the Index. The Index is adjusted and rebalanced quarterly in March, June, September and December and each Index constituent is assigned an equal weight

Replication: The Fund will employ a "passive management" (or indexing) investment strategy and will seek to employ a replication methodology, meaning as far as possible and practicable, it will invest in the securities in proportion to the weightings comprising the Index.

Dealing: Shares of the Fund (**Shares**) are listed on one or more stock exchanges. Typically, only authorised participants (i.e. brokers) can purchase Shares from or sell Shares back to the Fund. Other investors can purchase and sell Shares on exchange on each day the relevant stock exchange is open.

Distribution policy: Income received by the Fund's investments will not be distributed in respect of the Shares of this class and instead income will be accumulated and reinvested on behalf of the shareholders of the Fund.

Recommendation: This Fund may not be appropriate for short-term investment.

Currency: The base currency of the Fund is US Dollar.

For full investment objectives and policy details, please refer to the Supplement.

Risk and Reward Profile

The categorisation above is not guaranteed to remain unchanged and may shift over time.

The lowest category (1) does not imply a risk-free investment.

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The categorisation above (7) is due to the nature of the Fund's investments and risk associated with those investments, including:

- The value of underlying securities can be affected by daily financial market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- There is no assurance that any appreciation in the value of investments will occur, or that the investment objective of the Fund will be achieved.
- **Sectoral Risk: Gold mining companies Risk** The Fund's performance will depend on the overall condition of gold mining companies. Investments related to gold are considered speculative and are affected by a variety of factors. Competitive pressures may have a significant effect on the financial condition

of gold mining companies. Gold mining companies are highly dependent on the price of gold and may be adversely affected by a variety of worldwide economic, financial and political factors such as import controls, securing equity and/or debt financing, liability for environmental damage, depletion of resources, drilling and construction costs associated with the mining and processing of gold, expenditures for safety and pollution control devices, Increased environmental or labour costs governmental regulation on privatisation, pricing and supply and other intervention. Mining companies may also be adversely affected by local or regional factors where the companies operate such as natural disasters or other events with significant economic impact.

In times of significant inflation or great economic uncertainty, gold, silver and other precious metals may outperform traditional investments such as bonds and stocks and underperform relative to traditional equity and debt investments in times of stable economic growth, which could in turn affect the Fund's returns.

- **Screening Risk :** There is a risk that the Index Provider may make errors, such as incorrect assessment of the screen criteria described in the section entitled General Description of the Index and/or include incorrect/exclude correct constituents in the screening process.

- **Investment risk:** Investment risk may be concentrated in specific sectors, countries, currencies or companies. This means that the Fund may be more sensitive to any localised economic, market, political or regulatory events.
- **Currency risk:** The Fund invests in securities denominated in currencies other than its base currency. Changes in the exchange rates may adversely affect the performance of the Fund.
- Risks not covered by the indicator, but which are materially relevant to the Fund include:
- **Liquidity on secondary market risk:** There can be no certainty

that Shares can always be bought or sold on a stock exchange or that the market price will reflect the NAV of the Fund. It may be difficult for the Fund to buy or sell certain investments in some market conditions. Consequently, the price obtained when the Fund buys or sells securities may compare adversely to the price under normal market conditions.

For a complete overview of all risks attached to this Fund, refer to the section entitled "Risk Factors" in the Supplement and the Prospectus.
