Lazard Listed Private Markets Fund EA Dist GBP

Lazard Listed Private Markets Fund is a sub-fund of Lazard Global Active Funds Public Limited Company (the "UCITS")

ISIN: IE000FQDCH16

This Fund is managed by Lazard Fund Managers (Ireland) Limited, part of the Lazard Group

Objectives and Investment Policy

Lazard Listed Private Markets Fund (the "Fund") aims to achieve long term capital growth with income as a secondary component of total return.

The Fund is actively managed and invests in a long-only, diversified portfolio comprised primarily of listed securities which derive not less than 50% of their intrinsic value (common measures of which include net asset value or market capitalisation) from exposure to global private market assets (including private equity, private credit, real estate and infrastructure).

The Investment Manager conducts extensive fundamental research to identify investments and aims, wherever possible, to acquire such investments when they are trading at a discount to what the Investment Manager has determined to be their long-term intrinsic value.

The Fund may invest in equities and equity-related securities (common and preferred stocks, depositary receipts, warrants and rights); listed closed-end funds and fixed and/or floating rate bonds and other debt instruments.

The Fund may also invest up to 10% of its value in units or shares of other open-ended investment funds (including exchange traded funds).

The Fund may use derivatives (which are financial contracts whose value is linked to the price of an underlying investment) for the purposes of efficient portfolio management.

You can buy and sell shares in the Fund on any day on which the stock exchanges in London and New York are open for business.

The Fund has discretion as to which investments it will hold within the limits of the Investment Objective and Policy.

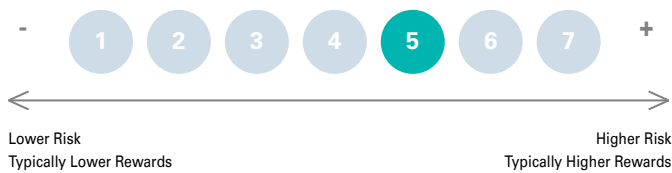

Any distributions that are paid to you will normally be reinvested to buy further shares unless you have elected to receive payment in cash.

The Fund's performance is measured against the performance of the MSCI World Net Total Return Index (USD) (the "Benchmark"), which the Investment Manager has assessed to be the most appropriate Benchmark for measuring performance. The Fund is not constrained by the Benchmark as it has flexibility to invest in securities and asset classes not included in the Benchmark.

The Fund promotes environmental and/or social characteristics within the meaning of Article 6 of Regulation (EU) 2019/2088, the "SFDR Regulation".

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within a short period of time.

Risk and Reward Profile

The risk and reward categories above are calculated using historic data and may not be a reliable indicator of the Fund's future risk profile. The risk and reward category may shift over time and is not a target or guarantee. The lowest category (i.e. category 1) does not mean "risk free".

The risk rating of this share class is calculated on the basis of historic volatility – i.e. how much the value of the underlying assets of the Fund has fluctuated over the last 5 years. As this share class does not have 5 years' performance data available, we have simulated the volatility, using a suitable proxy, based on historic data.

This share class has been placed in the risk category stated above, because based on the simulated historic data, the underlying assets within the Fund have shown moderately high volatility.

Please note, there are other risks that may not be reflected in the risk and reward categories above. Some of these risks are summarised below.

- There is no capital guarantee or protection of the value of the Fund. The value of your investment and the income from it can go down as well as up and you may not get back the amount you originally invested.
- The fund will invest in Listed Closed End funds, which are typically exposed to private markets. These markets trade at a premium/discount to their underlying assets and means the fund is exposed to changes in premiums in fair value.
- The returns from your investment may be affected by changes in the exchange rate between the Fund's base currency, the currency of the Fund's investments, your share class and your home currency.
- This is an unhedged share class, your shares will be exposed to exchange rate fluctuations between their denominated currency and the base currency of the Fund. This may affect the performance of your shares.

See "Risk Factors" in the UCITS' Prospectus and Fund Supplement for more information about risks.
