J O Hambro Capital Management Global Opportunities Fund

A Accumulating GB00BJ5JMC04

A sub-fund of J O Hambro Capital Management UK Umbrella Fund

Managed by JOHCM Funds (UK) Limited

Objectives and investment policy

- The Fund's investment objective is to achieve capital growth over a rolling seven to ten year period whilst generating income.
- The Fund seeks to take advantage of specific opportunities in global equity markets by investing at least 80% of its capital directly or indirectly in a concentrated portfolio of shares of companies listed on stock exchanges around the globe. It is anticipated that the Fund's portfolio will comprise fewer than fifty holdings.
- The Investment Manager selects the shares to invest in through an analysis of a company's financial statements and an assessment of the cash flows that the company is likely to generate in the future; thereby selecting shares which are considered to offer the best opportunity for returns, taking into account the risk of the investment.
- The Fund generally invests directly in shares but may invest indirectly via equity related instruments, such as equity linked notes and participation notes, in order to obtain a cost effective method of gaining access to some markets and to reduce settlement risk. The equity related instruments will be securitised, freely transferable and the Fund will not be leveraged as a result of holding them.
- The Fund may also hold up to 20% of its assets in cash or near cash (such as treasury bills, commercial paper or money market funds).
- The Fund is actively managed which means that the fund managers use their expertise to pick investments to achieve the objective of the Fund.
- The Fund does not have a target or constraining benchmark. However, the MSCI ACWI Standard Index may be used as a comparator benchmark as this is the broadest available index of liquid global shares.
- Any income the Fund generates for this share class is accumulated.
- You can buy and sell shares in the Fund on any day which is a working day in London. Instructions received before 12:00 noon will be processed that day. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.
- Recommendation: The Fund may not be suitable for those investors who plan to withdraw their money within seven years.

Risk and reward profile

↓ Lower risk ↓ Typically lower rewards			Higher risk ↓ Typically higher rewards ↓			
1	2	3	4	5	6	7

The risk and reward indicator is calculated on the basis of the share class volatility (the ups and downs in its value) over the prior 5 year period.

The risk and reward indicator:

- is based on simulated historical performance data and may not be a reliable indication for the future;
- is not guaranteed and may change over time.
- As this share class has not been in existence for 5 years, simulated performance data has been used.
- The lowest category does not mean that a share class is risk free.

The share class category reflects the following factors:

- Higher volatility can result from investments in shares as their value may fluctuate more than other financial instruments, such as bonds.
- The Fund may invest in shares priced in currencies other than the currency of the share class. This may result in the value of the share class increasing or decreasing due to changes in foreign exchange rates.
- Your initial investment is not guaranteed.

In addition to the risk captured by the indicator, the Fund value may be affected by:

- Changes in exchange rates between currencies may cause the value of

the investments to diminish or increase.

- Any change in the Company's tax status or in legislation could affect the value of investments held by the Company.
- Political and/or regulatory risks.
- Emerging markets risk: Investing in companies in emerging markets involves higher risk than investing in established economies or securities markets. Emerging markets may have less stable legal and political systems, which could affect the safe-keeping or value of assets. Investments in emerging markets' funds should not constitute a substantial portion of an investor's portfolio.
- As the portfolio is concentrated, it may be more volatile than a diversified one.

Investors should note that a more detailed description of risk factors is set out in full in the Prospectus.
