BNY MELLON
INVESTMENT MANAGEMENT

BNY Mellon Global Absolute Return Fund

INSTITUTIONAL SHARES W (ACCUMULATION) (ISIN: GB00B83VQG35)

a sub-fund of BNY Mellon Investment Funds. This Fund is managed by BNY Mellon Fund Managers Limited

Objectives and Investment Policy

OBJECTIVE

To deliver positive returns on an annual basis. The Fund aims to deliver returns before fees within a range of cash (SONIA (90-day compounded)) on a rolling 12-month basis and cash (SONIA (90-day compounded)) + 4% per annum on a rolling annualised five year basis. However, a positive return is not guaranteed and a capital loss may occur.

POLICY

The Fund will:

- gain exposure to a wide range of asset classes such as company shares (i.e. equities) and similar investments, bonds and similar debt investments and cash including investing in collective investment schemes that themselves invest anywhere in the world;
- invest in derivatives (financial instruments whose value is derived from other assets) to help achieve the Fund's investment objective. The Fund will also use derivatives with the aim of risk or cost reduction or to generate additional capital or income; and
- gain exposure to commodities (e.g. gold) and property through stock exchange listed investments and/or derivatives.

The Fund may:

- directly invest in a wide range of asset classes;
- employ strategies known as 'long/short' strategies which means that it will increase exposure (i.e. go long) to an investment it favours and short (using derivatives) other investments which it does not favour. These strategies may result in the Fund being leveraged. Leverage magnifies the exposure of the Fund to greater than the underlying investments. In such situations, returns may rise or fall more than they would have done otherwise, reflecting such additional exposure;

- invest significantly in cash and cash-like investments; and
- invest up to 10% of its assets in collective investment schemes, including those which are managed or operated by the authorised corporate director (ACD) or an associate of the ACD.

Benchmark: The Fund will measure its performance before fees against SONIA (90-day compounded) on a rolling 12-month basis (the "12 month Benchmark") and SONIA (90-day compounded) + 4% per annum on a rolling annualised five year basis (the "5 year Benchmark").

SONIA is a nearly risk-free rate meaning no bank credit risk is included, the rate can rise or fall as a result of central bank policy decisions or changing economic conditions. The Fund will use the 12 month Benchmark as a lower threshold for the Fund's performance to match or exceed over a rolling 12 month period, as it is representative of cash; and the 5 year Benchmark as an upper threshold for its performance to match or exceed over a rolling annualised 5 year basis, as it is consistent with the level of risk that the Fund takes. The Fund is actively managed, which means the Investment Manager has discretion over the selection of investments, subject to the investment objective and policies as disclosed in the Prospectus.

OTHER INFORMATION

Treatment of income: net income generated will be retained within the Fund and reflected in the value of your shares.

Dealing: you can buy and sell your shares in the Fund between 9:00 and 17:00 (UK time) on each business day in England and Wales. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is GBP 500,000.

Risk and Reward Profile

1 2 3 4 5 6 7

We have calculated the risk and reward indicator, as shown above. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility). It is not a guide to the future risk and reward rating of the Fund. The rating shown is not a target or guarantee and may shift over time. Even the lowest rating of 1 does not mean a risk-free investment.

This Fund is rated 4 because its historical value has shown moderate volatility. With a Fund rating of 4, you have a moderate risk of losing money but your chance for gains is also moderate.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

Objective/Performance Risk: There is no guarantee that the Fund will achieve its objectives.

Performance Aim Risk: The performance aim is not a guarantee, may not be achieved and a capital loss may occur. Funds which have a higher performance aim generally take more risk to achieve this and so have a greater potential for returns to vary significantly.

Currency Risk: This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.

Derivatives Risk: Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement

in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.

Credit Ratings and Unrated Securities Risk: Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.

Changes in Interest Rates & Inflation Risk: Investments in bonds/ money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.

Credit Risk: The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.

Concentration Risk: A fall in the value of a single investment may have a significant impact on the value of the Fund because it typically invests in a limited number of investments.

CoCo's Risk: Contingent Convertible Securities (CoCo's) convert from debt to equity when the issuer's capital drops below a pre-defined level. This may result in the security converting into equities at a discounted share price, the value of the security being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.

Counterparty Risk: The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".

Charges

The charges cover the costs of running the Fund, including the costs of marketing and selling. These charges reduce the potential growth of your investment.

ONE-OFF CHARGES TAKEN BEFORE OR AFTER YOU INVEST
