M&G European ex-UK Fund

a sub-fund of M&G Investment Funds (12)

Sterling Class I – Accumulation shares ISIN no. GB00BM8HSJ12

Managed by M&G Securities Limited

Objective and investment policy

The Fund aims to provide a higher total return (the combination of capital growth and income), net of the Ongoing Charge Figure, than that of the FTSE World Europe ex UK Index, over any five-year period.

Core investment: At least 80% of the fund is invested directly in the equity securities and equity related securities of companies that are incorporated, listed, domiciled or do most of their business in Europe excluding the UK.

Other investments: Other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

Derivatives usage: To reduce risks and costs.

Strategy in brief: The fund manager uses a bottom-up approach to identify stocks that they believe are undervalued. The fund manager aims to identify companies that are mispriced and so their value is likely to improve over time. The Fund's approach combines value-focused screening with rigorous qualitative analysis to ensure the Fund has a consistent and disciplined value bias, without compromising on the robustness of the portfolio's construction. The main drivers of returns are expected to be the value style and overall stock selection rather than any individual sector or stock.

Benchmark: FTSE World Europe ex UK Index The benchmark is a target which the fund seeks to outperform. The index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the Fund's performance and does not constrain the fund's portfolio construction. The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.

For performance measurement purposes the benchmark is shown or hedged into the relevant share class currency.

Risk and reward profile

▪ The above risk and reward indicator is based on simulated historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 6 because its simulated Net Asset Value has shown high rises and falls in value historically.

- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.
- Operational risks arising from a failure or delay in operational processes and systems, or the failure of a third party provider may affect the value of your investments. Where this results in compensation needing to be paid, this may be paid some time after the original loss is experienced.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature
