

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

CT (LUX) EUROPEAN CORPORATE BOND (THE "FUND")

Class 1G (GBP Accumulation Shares) LU1829337168, a sub-fund of Columbia Threadneedle (Lux) I (the "SICAV"), regulated by the CSSF.

The management company of the SICAV is Threadneedle Management Luxembourg S.A. (the "Management Company") (part of the Columbia Threadneedle Investments group of companies).

Objectives and Investment Policy

- The Fund aims to provide income with the potential to grow the amount you invested over the medium term.
- The Fund invests at least two-thirds of its assets in investment grade bonds (which are similar to a loan and pay a fixed or variable interest rate) priced in Euros and issued by companies in Europe, including the UK, or companies that have significant operations there. Bonds rated as investment grade, as defined by international agencies that provide such ratings, are considered safer than lower rated bonds but typically pay a lower income.
- The Fund may use derivatives (complex instruments) for hedging purposes and may also invest in asset classes and instruments different from those stated above.
- The Fund is actively managed in reference to the iBoxx Euro Corporate Bond Index. The index is broadly representative of the securities in which the Fund invests, and provides a suitable target benchmark against which Fund performance will be measured and evaluated over time. The index is not designed to specifically consider environmental or social characteristics. The fund manager has discretion to select investments with weightings different to the index, and that are not in the index, and the Fund may display significant divergence from the index.
- The Fund promotes environmental and social characteristics by integrating a range of responsible investment measures into the investment process, and ensures that the companies it invests in follow good governance practices. The Fund aims to compare favourably against the index over rolling 12-month periods when assessed using the Columbia Threadneedle ESG (environmental, social and governance) Materiality Rating model, which indicates how much exposure a company has to material ESG risks and opportunities. At least 50% of the Fund is invested in companies that have a strong rating. The Fund also commits to investing at least 20% of its assets in sustainable investments.
- The Fund excludes companies that derive certain levels of revenue from industries such as, but not limited to, coal and tobacco. It also excludes companies that have direct involvement in nuclear or controversial weapons, and companies determined to have breached international standards and principles.
- The fund manager engages with companies to encourage improvement of their ESG practices. The fund manager has committed to an ambition to reach net zero emissions by 2050 or sooner for this Fund using proactive engagement with companies held in the Fund to assist with progressing this, and will disinvest from companies that do not show progress in meeting minimum standards.
- Further information about the environmental or social characteristics promoted by the Fund is available in the SFDR RTS Annex of the Prospectus available at www.columbiathreadneedle.com. The Fund is considered to fall within the scope of Article 8 of SFDR.
- Income from investments in the Fund will be added to the value of your shares.
- You can buy or sell shares in the Fund on any day which is a business day in Luxembourg unless the directors have decided that insufficient markets are open. You can find more detail on the investment objective and policy of the Fund in the Prospectus. For more information on investment terms used in this document, please see the Glossary available at columbiathreadneedle.com.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The Fund is rated 4 because historically it has shown a medium level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- The Fund invests in securities whose value would be significantly affected if the issuer refused, was unable to or was perceived to be unable to pay.
- The Fund holds assets which could prove difficult to sell. The Fund may have to lower the selling price, sell other investments or forego more appealing investment opportunities.
- Changes in interest rates are likely to affect the Fund's value. In general, as interest rates rise, the price of a fixed rate bond will fall, and vice versa.
- The Fund may invest in derivatives (complex instruments linked to the rise and fall of the value of other assets) with the aim of reducing risk or minimising the cost of transactions. Such derivative transactions may benefit or negatively affect the performance of the Fund. The Manager does not intend that such use of derivatives will affect the overall risk profile of the Fund.
- The Fund applies a range of measures as part of its consideration of ESG factors, including the exclusion of investments involved in certain industries and/or activities. This reduces the investable universe, and may impact the performance of the Fund positively or negatively relative to a benchmark or other funds without such restrictions.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge:	5.00%
Exit Charge:	0.00%

These are the maximum charges that we might take out of your money before it is invested. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing Charges:	1.19%
------------------	-------

Charges taken from the fund under certain specific conditions

Performance Fee:	NONE
------------------	------

Switching charge (for switching into the Fund from another fund) 0.75%

The ongoing charges figure is based on expenses for the year ending 31/03/25. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).

For more information about charges please see the Fund's prospectus.

Past Performance

Source: Morningstar

Past performance is not a guide to future performance.

Fund launch date: 21/09/2018

Share/unit class launch date: 21/09/2018

Performance is calculated in GBP.

All charges and fees, except any entry, exit and switching charge, have been included within the performance.

This chart shows how much the Fund increased or decreased in value as a percentage each year.

△ Before this date the Fund had different characteristics.

Please refer to www.columbiathreadneedle.com for further details.

*iBoxx Euro Corporate Bond (Although the Fund makes reference to the index as part of the investment process, it is not intended that the performance of the Fund should track the index.)

The past performance information for the period prior to 21 September 2018 is from the Threadneedle European Corporate Bond (Class 1 Accumulation Shares (GBP) GB0032133448) (a UK authorised UK UCITS fund launched on 22 October 2002), which merged into this Fund on 22 September 2018. The past performance calculated before 21 September 2018 includes UK taxes but does not include Luxembourg taxes.

Practical Information
