

NON UCITS RETAIL SCHEME KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Class A Accumulation Units The HL Multi-Manager High Income Fund (“the Fund”)

The Fund is an Authorised Unit Trust established as a non-UCITS retail scheme ('NURS') as a Sub-Fund of HL Multi-Managers Umbrella Trust. ISIN GB00BYZ0ZL82. This fund is managed by Hargreaves Lansdown Fund Managers, part of Hargreaves Lansdown PLC.

This fund is authorised in the United Kingdom and regulated by the Financial Conduct Authority.

OBJECTIVES AND INVESTMENT POLICY

The investment objective of the Fund is to provide returns principally in the form of income.

The Fund may invest, either directly or indirectly via other collective investment schemes and exchange traded funds, in a range of assets including equities and floating and fixed interest securities. The Fund may also invest in money market instruments, deposits, warrants and (indirectly) in property.

The underlying funds in which the Fund will invest will generally be established in Europe (including the UK, Jersey and Guernsey).

The fund invests in debt securities issued by corporate bodies, governments and other entities. Investments in external funds are made on the basis of the long term track record of the managers of those funds.

The Fund may also use derivative instruments and forward transactions for the limited purposes of efficient portfolio management, including hedging.

If you invest in income units, income generated by fund investments will be paid out to you. If you invest in accumulation units, income will be reinvested.

You can normally buy or sell units in this Fund on each Business Day. Instructions received and accepted up until 11.00am will be dealt at the price calculated at 11.00am that day.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

RISK/REWARD PROFILE

The Fund is ranked at 5 because funds of this type have experienced moderate to high rises and falls in value in the past.

The Fund's risk category has been calculated using historical data, which may not be a reliable indication of the future risk profile of the Fund.

The Fund's category is not guaranteed to remain the same and may change over time.

Even a fund in the lowest category is not a risk-free investment.

The value of your investment and any income you take from it may fall as well as rise and is not guaranteed.

You might get back less than you invest.

The indicator does not take into account the following risks of investing in this Fund:

- Income provided by your investment in this fund will vary. Indicative income levels may not be achieved – in particular yields are quoted for illustrative purposes only and are not guaranteed.

- The Fund may invest in overseas holdings and so will be exposed to currency movements.
- The issuers of floating or fixed interest securities may suspend or cease interest payments, or may default on their debt.
- Floating or fixed interest securities may not be liquid, particularly during stressed market conditions.
- The Fund may invest in high yield bonds which carry a greater risk of default than investment grade bonds.
- Charges taken from the 'capital' of the fund may erode capital growth. Your capital could also decrease if income withdrawals exceed the growth rate of the fund.
- The Fund may invest in smaller companies, which are more volatile and sometimes more difficult to trade than larger companies.
- The Fund is valued using the latest available price for each underlying holding. These prices may not fully reflect changing market conditions. The Fund can apply a 'fair value price' to all or part of its portfolio to mitigate this risk. In extreme liquidity conditions, redemptions in the underlying funds, and/or the Fund itself, may need to be deferred or suspended.
- The Fund may use derivatives for efficient portfolio management purposes. There is a risk that any counterparty used does not fulfil its obligation.
