Responsible Horizons UK Corporate Bond Fund

INSTITUTIONAL SHARES W (ACCUMULATION) (ISIN: GB00B8KDLX41)

a sub-fund of BNY Mellon Investment Funds. This Fund is managed by BNY Mellon Fund Managers Limited

Objectives and Investment Policy

OBJECTIVE

To generate a return through a combination of income and capital returns, whilst taking environmental, social and governance ("ESG") factors into account. The Fund targets the outperformance of the S&P iBoxx GBP Collateralized & Corporate Index after fees over any rolling three year period (meaning a period of three years, no matter which day you start on). However, performance is not guaranteed and a capital loss may occur.

POLICY

The Fund will:

- typically invest at least 80% of its assets in sterling denominated (or hedged back to sterling) investment grade (as rated by Standard and Poor's or similar agencies) corporate debt securities;
- take ESG factors into account and will assess the overall suitability of an issuer based on an ESG score and additional sustainability criteria. The Fund will seek to obtain exposure to issuers with strong ESG scores and may therefore screen out issuers who are involved in industries/sectors which have weak ESG scores;
- invest at least 80% of its Net Asset Value (NAV) in corporate issuers that meet the sustainability criteria focusing on carbon reduction and positive environmental and/or social impact;
- exclude direct investment in corporate issuers with material involvement in activities the Investment Manager deems harmful from an environmental and/or social perspective; and
- limit investment in collective investment schemes to 10%.

The Fund may:

- invest in corporate bonds with low credit ratings (i.e. sub-investment grade bonds as rated by Standard and Poor's or similar agencies);

- use derivatives (financial instruments whose value is derived from other assets) with the aim of risk or cost reduction or to generate additional capital or income; and
- invest up to 30% of its NAV in assets that do not meet the Investment Manager's sustainability criteria. This includes government bonds, cash, near cash asset and money market instruments (including deposits, loans), transferable securities (such as commercial paper, convertibles, and certificates of deposit), equity linked securities (such as warrants and preference stock), Collective Investment Schemes and derivatives.

Benchmark: The Fund will measure its performance against the S&P iBoxx GBP Collateralized & Corporate Index (the "Benchmark") after fees over any rolling three year period (meaning a period of three years, no matter which day you start on). The Fund will use S&P iBoxx GBP Collateralized & Corporate Index as a target for the purposes of monitoring the risk taken in the Fund and the UK Investment Association's Sterling Corporate Bond NR Sector average as an appropriate comparator because it includes a broad representation of similar Sterling denominated funds that invest in corporate bonds. The Fund is actively managed, which means the Investment Manager has discretion to invest outside the Benchmarks, subject to the investment objective and policy as disclosed in the Prospectus.

OTHER INFORMATION

Treatment of income: net income generated will be retained within the Fund and reflected in the value of your shares.

Dealing: you can buy and sell your shares in the Fund between 9:00 and 17:00 (UK time) on each business day in England and Wales. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is GBP 500,000.

Risk and Reward Profile

We have calculated the risk and reward indicator, as shown above. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility). It is not a guide to the future risk and reward rating of the Fund. The rating shown is not a target or guarantee and may shift over time. Even the lowest rating of 1 does not mean a risk-free investment.

This Fund is rated 4 because its historical value has shown moderate volatility. With a Fund rating of 4, you have a moderate risk of losing money but your chance for gains is also moderate.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

Objective/Performance Risk: There is no guarantee that the Fund will achieve its objectives.

Currency Risk: This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.

Derivatives Risk: Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using

derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.

Changes in Interest Rates & Inflation Risk: Investments in bonds/money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.

Credit Risk: The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.

Counterparty Risk: The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

Responsible Investing Risk: The investment policy for this Fund places restrictions on its exposure to certain sectors or types of investments to reflect its responsible investing approach. The Fund's performance may be negatively impacted due to these restrictions in comparison to funds which do not have these restrictions. The Fund will not engage in securities lending activities and, therefore, may forego any additional returns that may be produced through such activities.

Charges to Capital: The Fund takes its charges from the capital of the Fund. Investors should be aware that this has the effect of lowering the capital value of your investment and limiting the potential for future capital growth. On redemption, you may not receive back the full amount you initially invested.

Performance Aim Risk: The performance aim is not a guarantee, may not be achieved and a capital loss may occur. Funds which have a higher performance aim generally take more risk to achieve this and so have a greater potential for returns to vary significantly.

CoCo's Risk: Contingent Convertible Securities (CoCo's) convert from debt to equity when the issuer's capital drops below a pre-defined level.

This may result in the security converting into equities at a discounted share price, the value of the security being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".
