BNY MELLON
INVESTMENT MANAGEMENT

BNY Mellon Multi-Asset Moderate Fund

T SHARES (INCOME) (ISIN: GB00BRJTWV14)

a sub-fund of BNY Mellon Investment Funds. This Fund is managed by BNY Mellon Fund Managers Limited

Objectives and Investment Policy

OBJECTIVE

To achieve capital growth and income over the long term (5 years or more).

POLICY

The Fund will:

- invest in a diversified portfolio of UK and international securities across a broad range of diversified asset classes, including equities (company shares), fixed interest securities (bonds), alternative asset classes (such as infrastructure, renewable energy, property, commodities), currencies, cash, near cash, deposits, warrants and approved money market instruments to provide a moderate level of risk and commensurate return;
- gain exposure to assets through a combination of transferable securities, collective investment schemes and derivatives;
- invest in derivatives (financial instruments whose value is derived from other assets) to help achieve the Fund's investment objective. The Fund will also use derivatives with the aim of risk or cost reduction or to generate additional capital or income; and
- invest between 20-60% of its asset value in equities.

The Fund may:

- invest in emerging markets;
- invest significantly in cash and cash-like investments;
- invest more than 35% of its Net Asset Value (NAV) in government and public securities issued or guaranteed by a single state, local authority or public international body;

- maintain a minimum of 30% of its Net Asset Value (NAV) in fixed interest securities and currencies;
- invest up to 15% of its Net Asset Value (NAV) in closed end funds;
- invest up to 10% of its Net Asset Value (NAV) in other collective investment schemes; and
- invest up to 10% of its Net Asset Value (NAV) in contingent convertible securities (CoCo's).

Benchmark: The Fund will measure its performance against the UK Investment Association's Mixed Investment 20-60% Shares NR Sector average, as a comparator benchmark (the "Benchmark"). The Fund will use the Benchmark as an appropriate comparator because it includes a broad representation of funds with levels of equity and bond exposure similar to those of the Fund.

The Fund is actively managed, which means the Investment Manager has discretion over the selection of investments, subject to the investment objective and policies as disclosed in the Prospectus.

OTHER INFORMATION

Treatment of income: income generated will be paid to shareholders semi-annually on or before 31 August and 28 February.

Dealing: you can buy and sell your shares in the Fund between 9:00 and 17:00 (UK time) on each business day in England and Wales. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is GBP 50,000,000.

Risk and Reward Profile

Lower risk
Potentially lower reward

Higher risk
Potentially higher reward

1 2 3 4 5 6 7

We have calculated the risk and reward indicator, as shown above. As this Fund has less than 5 years performance data available, it is based on simulated volatility. It is not a guide to the future risk and reward rating of the Fund. The rating shown is not a target or guarantee and may shift over time. Even the lowest rating of 1 does not mean a risk-free investment.

This Fund is rated 4 because its simulated historical value has shown moderate volatility. With a Fund rating of 4, you have a moderate risk of losing money but your chance for gains is also moderate.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

Objective/Performance Risk: There is no guarantee that the Fund will achieve its objectives.

Currency Risk: This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.

Derivatives Risk: Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.

Changes in Interest Rates & Inflation Risk: Investments in bonds/ money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.

Credit Ratings and Unrated Securities Risk: Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.

Credit Risk: The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.

Emerging Markets Risk: Emerging Markets have additional risks due to less-developed market practices.

China Interbank Bond Market and Bond Connect risk: The Fund may invest in China interbank bond market through connection between the related Mainland and Hong Kong financial infrastructure institutions. These may be subject to regulatory changes, settlement risk and quota limitations. An operational constraint such as a suspension in trading could negatively affect the Fund's ability to achieve its investment objective.

Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect ("Stock Connect") risk: The Fund may invest in China A shares through Stock Connect programmes. These may be subject to regulatory changes and quota limitations. An operational constraint such as a suspension in trading could negatively affect the Fund's ability to achieve its investment objective.

Volcker Rule Risk: The Bank of New York Mellon Corporation or one of its affiliates ("BNYM") has invested in the Fund. As a result of restrictions under the "Volcker Rule," which has been adopted by U.S. Regulators, BNYM must reduce its shareholding percentage so that it constitutes less than 25% of the Fund within, generally, three years of the Fund's establishment (which starts when the Fund's manager begins making investments for the Fund). Risks may include: BNYM may initially own a proportionately larger percentage of the Fund, and

any mandatory reductions may increase Fund portfolio turnover rates, resulting in increased costs, expenses and taxes. Details of BNYM's investment in the Fund are available upon request.

CoCo's Risk: Contingent Convertible Securities (CoCo's) convert from debt to equity when the issuer's capital drops below a pre-defined level. This may result in the security converting into equities at a discounted share price, the value of the security being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.

Counterparty Risk: The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".
