

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Allianz International Investment Funds - Allianz RiskMaster Moderate Multi Asset Fund Share Class Y (Accumulation) (GBP)

Managed by Allianz Global Investors UK Limited, part of Allianz Global Investors

ISIN: GB00BYMVB948

Objectives and Investment Policy

The Fund aims to achieve long term capital growth by taking a level of risk expected to be approximately 65% of the volatility of global equities defined as the MSCI World Index Net Total Return GBP, based on monthly data over a rolling 5 year period. The volatility level may fluctuate in the short term and is not guaranteed.

The Fund seeks to achieve its objective by maintaining the level of risk stated in the objective, and by using a strategic asset allocation model designed by the ACD to deliver an optimised risk and return profile. In addition the ACD will tactically manage asset allocation to enhance returns where appropriate.

The Fund may gain up to 100% of its exposure to permitted asset classes by investing in other funds managed by AllianzGI and/or Exchange Traded Funds managed by third parties. The Fund may also invest directly into these asset classes.

The ACD may invest up to 80% of its assets (allowing for leverage) into equities or securities equivalent to equities. In addition, index certificates and other certificates on equities, adequately diversified equity baskets and warrants may be acquired. Equities held in the Fund may be in Emerging Market Countries and Non-Developed Countries.

The Fund may invest up to 100% of its assets (allowing for leverage) in fixed income securities including global sovereign bonds (which includes agencies and municipalities), global credit (including high yield bonds) and global foreign exchange currencies.

The Fund may invest up to 100% of its assets (allowing for leverage) in deposits, money market instruments and/or money market funds.

The ACD may invest up to 10% of the Fund indirectly in commodities, through transferable securities (such as exchange traded commodities ("ETCs")) and/or units in collective investment schemes which give exposure to such materials.

The Fund will use derivative instruments such as but not limited to futures, options, options on swaps and swap agreements (e.g. interest rate swaps, index swaps, credit default swaps and inflation linked swaps) and currency forward contracts, for efficient portfolio management (including hedging) and, investment purposes.

As the Fund invests in various global asset classes, the ACD considers the MSCI World Index Net Total Return GBP to be the suitable source of volatility measurement for the Fund by which to monitor the stability of its portfolio. This volatility measurement may be obtained from the ACD on request.

You may redeem shares of the Fund usually on each business day by 12:00.

We reinvest income generated into the Fund.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

← Typically lower rewards
← Typically lower risk

Typically higher rewards →
Typically higher risk →

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the Fund.

The categorisation of the Fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

Why is the Fund in this category?

Funds of category 4 have shown in the past a medium volatility. The volatility describes how much the value of the Fund went up and down in the past. The units of a Fund of category 4 might be subject to medium price fluctuations based on historical volatilities.

We may invest directly or indirectly a significant portion of the Fund into bonds or money markets instruments. Issuers of these may fall into insolvency or suffer economic problems, in which case the interest on and/or capital of these assets may not be completely paid and/or the price of the assets may drop.

Charges

These charges are used to pay the costs of running the Fund, including the costs of marketing and selling. They reduce the potential growth of your investment.

One-off charges deducted before or after you invest

Entry Charge	0.00%
Exit Charge	0.00%

This is the maximum charge that might be taken out of your money before it is invested or before the proceeds of your investments are paid out.

Charges taken from the Fund over a year

Ongoing Charges	0.50%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find actual entry and exit charges from your financial adviser.

The ongoing charges shown are based on the Fund's last financial year ending 30.04.2025. It may vary from year to year. It does not include transaction costs incurred when we buy or sell assets for the Fund.

A dilution levy may be charged on purchases and redemptions of shares to protect the remaining investors against the costs incurred by the Fund in buying or redeeming its investments. This levy may be charged where the Fund is experiencing large levels of net purchases/redemptions and on "large deals" (i.e. deals of 2% or more of the value of the Fund). The amount of any such dilution levy is calculated by reference to the estimated costs of dealing in the underlying investments using the rates calculated for the preceding quarter.

You will find more details about the calculation of the charges in the Prospectus.

Past Performance

Past performance is not a reliable guide to future performance.

The past performance shown here takes account of all charges and costs with the exception of the entry and exit charge.

The Fund was launched in 2012.

The performance of the Fund is calculated in GBP.
