KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Aegon Global Short Dated High Yield Climate Transition Fund

a sub-fund of Aegon Asset Management Investment Company (Ireland) plc

Sterling (hedged) Class C - Income shares (ISIN: IE00BDCVTW61)

This fund is managed by Aegon Investment Management B.V.

Objectives and investment policy

Objective: to maximise total return (income plus capital).
Policy: invests predominantly in high yield (higher risk) bonds. The fund may also hold selected investment grade (lower risk) bonds and cash. Bonds will be issued by companies and governments worldwide and will have a maximum residual maturity of five and a half years.
The Fund is actively managed.
The Fund may also invest in derivatives (financial contracts whose value is linked to an underlying asset).
The Fund may invest up to 30% in emerging markets. In investment terms, this means those economies that are still developing.
Within the limits set out above, the Fund has discretion in its choice of investments and is not restricted by market sector. It may also hold a limited range of other investments and it is not constrained by any benchmark or index.
The Fund may use investment techniques to manage risks and costs. These techniques include 'hedging' (using derivatives to reduce the risk associated with making investments in other currencies). Up to 20% of the Fund may not be 'hedged' i.e. the Fund is exposed to the risks of investing in another currency for this portion.
The Fund may invest in use-of-proceeds labelled bonds (including green, blue, or other sustainability themed bonds), which are bonds the proceeds from which are used for specific projects or investments. Green bonds provide finance for environmentally and/or climate friendly projects and blue bonds provide finance for marine and ocean based projects or investments. The Fund may also invest in sustainability linked bonds, which are bonds for which the financial and/or structural characteristics are tied to predefined sustainability or ESG objectives. The Fund's exposure to such use-of-proceeds labelled bonds and sustainability linked bonds is currently not material, however this may change over time and is not subject to any aggregate limit.
The positive environmental characteristics the Fund promotes are transition to a low carbon economy and adaption to climate change by investing the majority of the Fund's net assets in issuers that have robust and credible plans to transition towards a low carbon economy based on the Investment Manager's internal climate transition categories. The Investment Manager will firstly, apply an exclusionary screen to exclude investments which the Investment Manager considers have a negative impact on society and/or the environment. Then will categorise issuers (including ancillary liquid assets and the underlying securities of single named derivatives) according to their level of alignment with progress towards a net-zero economy. The categories, as set out in the Investment Manager's proprietary climate categorisation system, will range from 1 to 5, with 1 being the highest category for leaders that are driving the net-zero transition i.e., "Leaders" and 5 being the lowest category for those laggards that are actively hindering climate progress i.e. "Laggards". The focus will be on supporting issuer's energy transition using quantitative and qualitative information to increasingly invest in issuers with solid plan of energy transition and reducing and restricting exposure to whose issuers who do not have such plans. Climate categories 1 to 3 ("Leaders", "Prepared" or "Transitioning") are determined as having a clear and measurable path to transition with the 1 to 3 categories determining the relative strength and success of that path. Climate categories 4 and 5 ("Unprepared" or "Laggards") are not yet on an identifiable path to transition.
In addition, the Fund's bond investments (for the avoidance of doubt excluding ancillary liquid assets, collective investment schemes, index derivatives and collateral based derivatives) are subject to the Investment Manager's additional ESG Risk criteria. The Investment Manager, through assessing the ESG evaluation undertaken by its credit research team, identify issuers using a proprietary ESG framework to construct a portfolio with issuers who have been identified as having the best ESG categories, with the lowest ESG risks - with ESG category 1 being the highest ESG category and 5 being the lowest. The Fund will invest at least 90% of its bond portfolio in those securities with ESG categories 1, 2, or 3, with up to 10% in securities identified as ESG category 4 or unrated securities. The Fund will not invest in securities with ESG category 5. Please see the Fund's Supplement for a full description of the Investment Manager's climate transition and ESG framework and criteria. The fund promotes E/S (i.e Environmental and Social) characteristics within the meaning of Article 8 of the Sustainable Finance Disclosure Regulation (SFDR).
Other information
You can buy, sell or exchange the Fund's shares on any business day (see 'Key Information for Buying and Selling' in the Fund Supplement to the Prospectus for more information).
You can buy, sell or exchange the Fund's shares on any business day (see 'Key Information for Buying and Selling' in the Fund Supplement to the Prospectus for more information).
Note: the currency of this share class is different from the base currency of the Fund. We use investment techniques which aim to eliminate the impact of exchange rate changes between the share class currency and the currency of the Fund. Aegon Asset Management Investment Company (Ireland) plc operates two different methods of hedging share classes. Full details of these can be found in the Prospectus.
Income the Fund receives will be paid out every three months.
It is expected that the Fund will be held as part of a diversified portfolio which may include other assets such as bonds, equities, property and cash.

Comparator Benchmark: The Fund is actively managed and is not constrained by any benchmark, other than the Bloomberg Global High Yield Corporate 1-5 Year Ba/B Index GBP Hedged which will be used as a reference point to measure carbon intensity; the Fund is not designed to track the composition of this index and is not constrained by its constituents.
Target Performance: The Investment Manager expects that the Fund will return 13/02/2026 at a rate of SONIA plus 3.0% per annum, over a rolling three-year period gross of fees and expenses of the Fund. SONIA, is the effective overnight interest rate by banks for unsecured in the British Sterling market. Although the Fund expects to reach this level of 13/02/2026, there is no guarantee that this will be achieved. The Fund's capital is at risk meaning that the Fund could suffer a decrease in value at any time.

Risk and reward profile

1	2	**3**	4	5	6	7

Lower risk / potentially lower rewards — **Higher risk / potentially higher rewards**

The risk/reward profile shows the risk of investing in the Fund, based on the rate at which funds of this type changed in the past. This Fund has the above risk/reward rating because bond prices can be affected by political or economic events and changes in exchange rates. Funds in category 3 have in the past shown moderately low volatility. With a fund of category 3, you have a moderately low risk of losing money but your chance for gains is also moderately low.
The Fund's category is not guaranteed and may change over time. It is calculated using historical data, which may not be a reliable indication for the future. Category 1 does not mean 'risk free'.
The following risks which are not, or are not fully, reflected in the risk/ reward profile are also relevant to the Fund:
Credit: An issuer of bonds may be unable to make payments due to the Fund (known as a default). The value of bonds may fall as default becomes more likely. Both default and expected default may cause the Fund's value to fall. High yield bonds generally offer higher returns because of their higher default risk and investment grade bonds generally offer lower returns because of their lower default risk.
Liquidity: The Fund's value may fall if bonds become more difficult to trade or value due to market conditions or a lack of supply and demand. This risk increases where the Fund invests in high yield, off-benchmark or emerging market bonds.
Counterparty: Investments such as derivatives are made using financial contracts with third parties. Those third parties may fail to meet their obligations to the Fund due to events beyond our control. The Fund's value could fall because of: (i) loss of monies owed by the counterparty; and/or (ii) the cost of replacement financial contracts.
Other markets: The Fund may invest in countries which have less developed political, economic and legal systems and which provide fewer investor protections. Difficulties in buying, selling, safekeeping or valuing investments in such countries may reduce the value of the Fund.
Concentration risk: The Fund may invest more than 35% of its value in securities issued by a single Government or other Public issuer. Holding a limited number of underlying investments means a change in the value of any one investment has more impact on the Fund's value. This increases potential gain but also potential loss.
Derivatives: The value of derivatives depends on the performance of an underlying asset. Small changes in the price of that asset can cause larger changes in the value of the derivative. This increases potential gain but also potential loss.
Fund charges: The Fund charges its fees against capital, which will increase the amount of income available for distribution to Shareholders, but may constrain capital growth.
Interest Rate Risk: Bond values are affected by changes in interest rates. When interest rates rise, the value of the Fund is likely to fall.
Full details of risks are disclosed in the 'Risk Factors' section of the Fund Supplement to the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	0.29%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures, and in some cases you may pay less. You can find out specific charges which apply to your investment by contacting your financial adviser, distributor, or by contacting us using the details given in the Practical Information section.
The ongoing charge is an estimate based on expenses for the year to 31 December 2025 for a similar share class. This figure may vary from year to year. It excludes any portfolio transaction costs (except in the case of an entry/exit charge paid by the Fund when buying and selling shares in another fund).
Exchanging your holdings into another sub-fund of the Company: the first five exchanges in a calendar year are free, and subject to a charge of 1.5% on each transaction thereafter.
More detailed information on charges can be found in the 'Fees and Expenses' section of the Fund Supplement to the Prospectus.

Past performance

	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
Sterling (hedged) Class C (IE00BDCVTW61)			-1.8	8.0	4.1	3.5	-2.1	10.0	7.0	7.6
Bloomberg Global High Yield Corporate 1-5 Year Ba/B Index GBP Hedged			-1.4	9.3	3.6	2.0	-8.0	11.0	8.1	7.9
FTSE SONIA 3M Compounded Rate			0.7	0.8	0.3	0.1	1.0	4.3	5.2	4.3

Past performance is not a guide to future performance.
Fund launch date: 14 June 2017
Share class launch date: 14 June 2017
Performance is calculated in GBP.
The past performance calculation does not take into account the entry and exit charges but does take into account the ongoing charge, as shown in the 'Charges' section.
This fund was previously known under the name of Aegon Short Dated High Yield Global Bond fund until 18th Dec 2023

Practical information

Aegon Asset Management Investment Company (Ireland) plc ("the Company") is an umbrella fund with segregated liability between sub-funds.
You can exchange your holdings into another share class of the Fund, or another sub-fund of the Company, at any time. More detailed information on exchanging can be found in the 'Exchange of Shares' section of the Prospectus.
The assets and liabilities of the Fund are segregated by law. Accordingly, the assets of this Fund belong exclusively to it and may not be used to meet the liabilities of, or claims against, any other fund within the Company. Any liability incurred on behalf of, or attributable to, the Fund shall be discharged solely out of the assets of the Fund.
The Depositary of the Fund is Citibank Depositary Services Ireland Limited.
The prices of shares will be published daily on our website (www.aegonam.com).
