Franklin Global Sukuk Fund

Class W (Qdis) GBP-H1 • ISIN LU2407588818 • A sub-fund of Franklin Templeton Shariah Funds
The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

Franklin Global Sukuk Fund (the "**Fund**") investment objective is to seek to maximise income and growth of capital (total return).

Investment Policy

The Fund mainly invests in Shariah-compliant corporate and government bonds, such as sukuks, denominated in any currency. These investments may be from anywhere in the world, including emerging markets, and some of them may be below investment grade.

To a lesser extent, the Fund may invest in structured products and asset- and mortgage-backed securities.

Derivatives and techniques The Fund may use derivatives for reducing risks (hedging) and costs, and to generate additional income or growth.

SFDR category Article 6 (does not promote environmental and/or social characteristics or have a sustainable investment objective under EU regulations).

Base currency US dollar (USD).

Benchmark(s) Dow Jones Sukuk Index. Used for performance comparison only.

The Fund is actively managed and may deviate materially from that of the benchmark(s).

Buying and selling shares

You may normally buy or sell shares on any day the New York Stock Exchange is open for business.

Intended retail investor

Investors who understand the risks of the Fund and plan to invest for at least 3 years. The Fund may appeal to investors who:

• are looking for a combination of income and investment growth

• are interested in exposure to Shariah-compliant bond markets as part of a diversified portfolio

• have a medium risk profile and can tolerate moderate short-term changes in the share price

Product availability The Fund is available to all investors with at least basic investment knowledge, through a wide range of distribution channels, with or without the need for advice.

Terms to Understand

bonds, below investment grade: Bonds represent an obligation to repay a debt, along with interest. Below investment grade bonds generally pay higher interest rates but are considered less likely to make all scheduled payments or repay the initial debt.

derivatives: Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

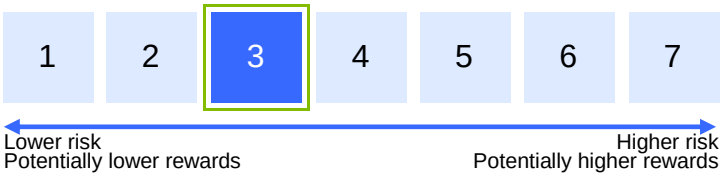
emerging markets: Markets of less economically developed nations, such as some nations in Asia, Africa, Eastern Europe and Latin America.

sukuks: A type a bond that finances Sharia-compliant activities.

Share Class Currency: GBP

Treatment of Income: For the distribution share class shown in this document, dividend income is distributed to shareholders.

Risk and Reward Profile



What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund invests mainly in Shariah-compliant debt securities, including Sukuk and short-term instruments of any quality issued by entities located in developed and emerging markets. Such securities have historically been subject to price movements, generally due to the supply and demand for financing, other market factors or movements in the Sukuk market. As a result, the performance of the Fund can fluctuate moderately over time.

Risks materially relevant not adequately captured by the indicator:

Counterparty risk: the risk of failure of financial institutions or agents (when serving as a counterparty to financial contracts) to perform their obligations, whether due to insolvency, bankruptcy or other causes.

Credit risk: the risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, sub-investment-grade securities.
Foreign Currency risk: the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.
Derivative Instruments risk: the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks.
Emerging markets risk: the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues.
Liquidity risk: the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the assets.
Shariah compliance risk: the risk that the restriction to invest only in Shariah-compliant securities may place the Fund at a comparative disadvantage vs. funds that do not have this restriction. Returns to shareholders may also be reduced due to payments to Shariah approved charities to "purify" dividends
Sukuk risk: the risk of loss arising from investing in sukuk instruments, which may fluctuate in value due to the impact of macro-economic factors on the supply and demand for financing or the willingness or ability of the counterparty (sovereign, sovereign-related, or corporate) to make payments according to the terms of the Sukuk.
