Quilter Investors Gilt Index Fund U2 (GBP) Income Shares (GB00BJ38GP04)

A sub-fund of Quilter Investors OEIC. Managed by Quilter Investors Limited

Objectives and Investment Policy

**Objective:** aims to achieve capital growth by tracking the performance of the ICE BofAML UK Gilt Index before fees are deducted.

**Policy:** the Fund will invest not less than 70% of the value of its property in UK Gilts. Investment will generally be made in proportion to the weightings in the ICE BofAML UK Gilt Index.

Non-Sterling currency exposure will be hedged back into Sterling.

The Fund may use derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment) with the aim of reducing the overall costs and/or risks of the Fund.

The Fund is managed by an investment adviser selected by the Manager for their expected ability to manage the Fund according to the investment objective and policy. The Manager continuously monitors and may periodically make changes to this appointment.

**Target benchmark:** the target benchmark for the Fund is the ICE BofAML UK Gilt Index. The target benchmark also acts as a constraining benchmark for the Fund, as investment will generally be made in proportion to the weightings of the benchmark. The Fund is passively managed. The investment adviser aims to replicate the performance of the index.

**Recommendation:** the Fund may not be appropriate for investors who plan to withdraw their money within five years.

**Treatment of income:** income from investments will be paid to shareholders.

**Dealing:** you can generally buy and sell shares on any day on which the London Stock Exchange is open for normal business – please refer to the Prospectus for exceptions.

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the Fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Funds in category 4 have in the past shown moderate volatility. With a fund of category 4, you have a moderate risk of losing money but your chance for gains is also moderate.

**Investment risk** - there is no guarantee that the Fund will achieve its objective. A capital loss of some or all of the amount invested may occur.

**Index-tracking risk** - the performance of the Fund will depend on the performance of the relevant index and the success of the Fund in tracking that index.

**Interest rate risk** - investments in bonds are affected by interest rates and inflation trends which may affect the value of the Fund.

**Derivative risk** - the Fund may use derivatives to reduce costs and/or the overall risk of the Fund (i.e. Efficient Portfolio Management (EPM)). Derivatives involve a level of risk, however, for EPM they should not increase the overall riskiness of the Fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.

**Capital erosion risk** - the Fund takes its charges from the capital of the Fund. Investors should be aware that there is potential for capital erosion if insufficient capital growth is achieved by the Fund to cover the charges. Capital erosion may have the effect of reducing the level of income generated.

For full details of the Fund's risks, please see the section in the prospectus headed "Risks".
