The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Quilter Investors UK Equity Index Fund U2 (GBP) Accumulation Units (GB00BJ4GCR78)

A sub-fund of Quilter Investors Trust. Managed by Quilter Investors Limited

Objectives and Investment Policy

Objective: aims to achieve capital growth through a portfolio of investments aimed at tracking the performance of the FTSE All-Share Index before fees are deducted.

Policy: the Fund invests at least 95% of the value of its property in shares of companies that make up the FTSE All-Share Index.

The Fund may use derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment) with the aim of reducing the overall costs and/or risks of the Fund and/or generating additional income or growth (often referred to as 'Efficient Portfolio Management').

The Fund is managed by an investment adviser selected by the Manager for its expected ability to manage the Fund according to the investment objective and policy. The Manager continuously monitors and may periodically make changes to this appointment.

Target benchmark: the target benchmark for the Fund is the FTSE All-Share Index. The target benchmark also acts as a constraining benchmark for the Fund as investment will generally be made in proportion to the weightings of the target benchmark. The Fund is passively managed. The investment adviser aims to replicate the performance of the target benchmark.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within five years.

Treatment of income: as units in this class are accumulation units, income from investments will be reinvested into the Fund and reflected in the value of the units.

Dealing: you can generally buy and sell units on any day on which the London Stock Exchange is open for normal business – please refer to the Prospectus for exceptions.

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the Fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

Funds in category 6 have in the past shown relatively high volatility. With a fund of category 6, you have a relatively high risk of losing money but your chance for gains is also relatively high.

Investment risk - there is no guarantee that the Fund will achieve its objective. A capital loss of some or all of the amount invested may occur.

Index-tracking risk - the performance of the Fund will depend on the performance of the relevant index and the success of the Fund in tracking that index.

Company shares (i.e. equities) risk - the value of company shares may rise and fall due to the performance of individual companies or because of general market and economic conditions.

Geographic concentration risk - a fall in the UK market may have a significant impact on the value of the Fund because it primarily invests in this market.

Currency risk - the Fund is denominated in British Pounds but may hold assets denominated in other currencies. The value of your units may rise and fall as a result of exchange rate movements.

Derivative risk - the Fund may use derivatives for Efficient Portfolio Management (EPM). Derivatives involve a level of risk, however, for EPM they should not increase the overall riskiness of the Fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.

Capital erosion risk - the Fund takes its charges from the income of the Fund in the first instance. The impact of Fund charges may be material on the value of any income you receive from your investment. There is potential for capital erosion if insufficient income is generated by the Fund to cover these charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risks" section of the prospectus.

Charges

These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. Overall, they reduce the growth of your investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charge	0.38%
----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	None
-----------------	------

The ongoing charge figure is based on the Fixed Ongoing Charge which is detailed in the prospectus, but may also include charges for investing in closed-ended funds such as investment trusts. The ongoing charge figure excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares in another collective investment undertaking and may vary from year to year.

You can find out more details about the charges applicable to this Fund by looking at Appendix I of the prospectus and the Charges and Expenses disclosure at www.quilter.com/charges-and-expenses.

Past Performance

Past performance is not a guide to future performance.

The past performance shown does not take into account any entry or exit charges but does take into account the ongoing charge, as shown in the Charges section.

The value of the class is calculated in British Pounds. The Index is in British Pounds. The Fund launched on 13 December 2002. This class started to issue units on 17 February 2014.
