FUND OVERVIEW

FUND AIM

The objective of this fund is to provide income, with some potential for growth. The fund will typically invest between 90% and 100% in company shares. The fund will invest in a broad spread of company shares from all economic sectors. The company shares the fund invests in will be from Asia (excluding Japan), the rest of the Pacific region and Australasia. The fund may use derivatives to reduce risk or cost, or to generate additional capital or income with no, or an acceptably low, level of risk. The fund may also invest in cash or deposits.

INVESTMENT PHILOSOPHY

The Fund seeks to provide a yield above the FTSE All World Asia Pacific (ex Japan) universe through detailed research on high yield and high cash flow companies. It looks to benefit from the diversity of 13 Asian markets and capital growth in the region, whilst using a highly experienced, small team to implement investment decisions quickly.

IMPORTANT INFORMATION

Fund size is based on mid price.

Investments are subject to exchange rate movements as the underlying securities are held in local currency. This fund may have larger and more frequent changes in value because it invests in shares of companies in the Asia and Pacific regions.

Please note that there may be small differences in the asset class classification between this factsheet and those provided by third parties for the same fund. This is because different entities can employ different criteria to classify securities.

* The Historic Yield reflects distributions declared over the past twelve months as a percentage of the midmarket unit price, as at the date shown. It does not include any initial charge and investors may be subject to tax on their distributions.

The value of an investment and any income taken from it is not guaranteed and may go up and down.
