12 Month Yield = (Sum of Dividends) / (Ending NAV). The 12 Month yield is calculated based on the sum of the distributions over the previous 12 months and the latest NAV. The 12 month yield may be higher or lower than the actual annual dividend yield. A positive distribution yield does not imply positive return. Dividends are not guaranteed. Past dividends are not indicative of future dividends.

Please note that a positive distribution yield does not imply a positive return. Investors should not make any investment decision solely based on information contained in the table above. You should read the relevant offering document (including the key facts statement) of the fund for further details including the risk factors.

Fund Objectives

The aim of this Fund is to: (i) provide long-term capital growth over a period of 5 years or more; and (ii) seek to achieve sustainable investment objective, in line with a responsible investment approach.

The Fund invests at least 80% of its assets in shares of listed companies of any size which are based anywhere in the world and which the fund manager believes will generate both above-average returns and a positive and measurable impact on environmental, social and governance (ESG) factors. In selecting shares, the fund manager applies AXA IM Group's sector specific investment guidelines relating to responsible investment to the Fund. Such guidelines

exclude investment in (or exposure to) certain companies based on their involvement in specific sectors (such as soft commodities, palm oil, controversial weapons and climate risks). The fund manager also applies the AXA Investment Managers' ESG Standards policy. This policy excludes investment in companies based on their contribution to climate change, tobacco production, manufacture of controversial weapons, human rights, anti-corruption and other ESG factors. Further, the fund manager will, in addition to the application of the above policies, use the issuer's ESG score (produced by an internal ESG scoring system as detailed in the AXA Investment Managers' ESG Standards policy) to exclude those issuers in the lowest ten percent in respect of their Environment or "E" scores. The fund manager will also use the ESG score as one factor within its broader analysis of the issuer to make selections which are expected to generate growth over time and to contribute to the transition to a zero-carbon sustainable economy. The ESG score is, however, just one component of the investment process and is not the sole driver of the investment decision making process. The fund manager will then seek to identify issuers with exposure to the clean economy. The fund manager defines the clean economy as the universe of companies whose activities address the environmentally focussed UN Sustainable Development Goals through improving resource sustainability, supporting the energy transition or addressing the issue of water scarcity. The fund manager will focus on such issuers which operate across the following four key areas: low carbon transport, smart energy, natural resource preservation and agriculture and food supply (but may also invest in such other industries which contribute to the clean transition). The fund manager will aim to select high quality issuers in these areas, including by using a responsible investment 'selectivity' approach which selects on the basis of qualitative factors such as commitment of the issuer to achieve and measure impact against the UN Sustainable Development Goals (with a particular focus on the planet), its strategic direction and consideration of ESG risk, among other considerations. The fund manager has full discretion to select investments for the Fund in line with the above investment policy and in doing so may take into consideration the MSCI AC World Total Return Net. The Fund may use derivatives for investment purposes as well as for Efficient Portfolio Management. The MSCI AC World Total Return Net is designed to measure the performance of mid-cap to large-cap stocks from a number of developed and emerging markets as selected by the Benchmark provider. The Benchmark best represents the universe of companies from which the portfolio will be selected, following the application of the Manager's ESG standards and criteria. The Fund is actively managed in reference to the MSCI AC World Total Return Net, which may be used by investors to compare the Fund's performance.

Investment Horizon

This Fund may not be suitable for investors who plan to withdraw their contribution within five years.

Risk Characteristics

The risk category is calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time. The lowest category does not mean risk free.

Why is this Sub-Fund in this category?

The capital of the Fund is not guaranteed. The Fund is invested in financial markets and uses techniques and instruments which may be subject to sudden and significant variation, which may result in substantial gains or losses.

Additional Risk

Concentration Risk: as this Fund may, from time to time, hold relatively few investments, it may be subject to greater fluctuations in value than a fund holding a larger number of investments.

Currency Risk: the Fund holds investments denominated in currencies other than the base currency of the Fund. As a result, exchange rate movements may cause the value of investments (and any income received from them) to fall or rise affecting the Fund's value.

Further explanation of the risks associated with an investment in this Fund can be found in the prospectus.

Subscription Redemption

Your orders to buy, sell or transfer units in the Fund must be received by the Administrator by 12 noon on any working day, to receive that day's Fund price. Please note that if your order is placed by an intermediary or Financial Adviser they may require extra processing time. The Net Asset Value of this Fund is calculated on a daily basis.

Minimum initial investment: £100,000
Minimum subsequent investment: £5,000

ESG Metrics Definition

The ESG absolute rating is based on a proprietary scoring methodology. If the fund has one tree (5 trees), it means that it is in the lowest (highest) ESG absolute rating category. For more information on the methodology, please visit <https://www.axa-im.com/responsible-investing>.

ESG relative rating is calculated as the difference between the ESG absolute rating of the portfolio and the ESG absolute rating of its benchmark. If ESG Relative rating is positive (negative), this means that the portfolio has a higher (lower) ESG absolute rating than the benchmark.

CO2 relative intensity is calculated as the difference between the CO2 intensity of the fund (expressed in tCO2/M€ Revenues) and the one of the benchmark.

If CO2 Relative intensity is green, it means that the intensity of the portfolio is lower than that of the benchmark. If CO2 Relative intensity is orange, it means that the intensity of the portfolio is higher than that of the benchmark. If CO2 Relative intensity is yellow, it means that the intensity of the portfolio is similar than that of the benchmark.

ESG indicators are for informational purposes only. The portfolio has neither statutory nor contractual ESG objectives.

Past performance is not a guide to current or future performance, and any performance or return data displayed does not take into account commissions and costs incurred when issuing or redeeming units. The value of investments, and the income from them, can fall as well as rise and investors may not get back the amount originally invested. Exchange-rate fluctuations may also affect the value of their investment. Due to this and the initial charge that is usually made, an investment is not usually suitable as a short term holding. Commissions and costs have an adverse effect on the performance of the fund.

The Fund referenced herein has not been registered under the United States Investment Company Act of 1940, as amended, nor the United States Securities Act of 1933, as amended. None of the shares may be offered or sold, directly or indirectly in the United States or to any US Person unless the securities are registered under the Act, or an exemption from the registration requirements of the Act is available. A US Person is defined as (a) any individual who is a citizen or resident of the United States for federal income tax purposes; (b) a corporation, partnership or other entity created or organized under the laws of or existing in the United States; (c) an estate or trust the income of which is subject to United States federal income tax regardless of whether such income is effectively connected with a United States trade or business. In the United States, this material may be distributed only to a person who is a "distributor," or who is not a "U.S. person," as defined by Regulation S under the U.S. Securities Act of 1933 (as amended).

For the purposes of presenting the breakdown by country, sector, principal exposures and active strategies, equities and similar instruments relating to a single company (ADRs, GDRs, RSPs, rights, etc.) are grouped in order to form a single exposure for the said company.

The geographical breakdown is based on the country classification as published by the index provider (or the main index provider in case of a composite benchmark). The second available source is the Country ISO from Bloomberg (or Ultimate Country of risk for Emerging fund).

Annual turnover rate : Sum the last 12 monthly results to obtain the turnover rate over 1 rolling year, calculated according to the following formula: $(\text{abs}(\text{purchase}) + \text{abs}(\text{sale}) - \text{abs}(\text{subscription} - \text{redemption})) / (2 * \text{average AUM})$.

Purchase and sale exclude derivatives, short term instruments and some corporate actions.

Subscription and redemption are netted on a monthly basis, impact of inflows and outflows can result in negative turnover which does not reflect portfolio turnover, therefore annual turnover has a floor of 0.
