Opportunities

- + High return potential of stocks in the long run
- + Investments specifically in the stock markets of the Asian-Pacific region
- + Particular potential of investments in developing countries
- + Currency gains against investor currency possible

Risks

- High volatility of stocks, losses possible. The volatility of fund unit prices may be strongly increased
- Underperformance of the stock markets of the Asian-Pacific region possible
- Investments in developing countries subject to high risk of volatility and losses
- Currency losses against investor currency possible

- 1) © 2007 Morningstar, Inc., all rights reserved. The information given here: (1) is protected by copyright for Morningstar and/or its content providers; (2) may not be reproduced or distributed; and (3) is not guaranteed to be accurate, complete or up-to-date. Morningstar and its content providers assume no responsibility for any losses or damage that result from any use of the information provided. Past performance is not a guarantee of future results. To determine the Morningstar Rating, funds of a comparable group in issue for at least three years are considered. The long-term performance serves as a basis, taking into account fees and risk. As a result, the funds are awarded stars, which are calculated monthly: Top 10%: 5 stars; next 22.5%: 4 stars; middle 35%: 3 stars; next 22.5%: 2 stars; flop 10%: 1 star. A ranking, rating or award is not an indicator of future performance and is subject to change over time.
- 2) Calculated at the net asset value, excl. front-end load, distributions reinvested. Calculation according to method as defined by BVI, the German Fund Companies Association. **Any front-end loads reduce the capital employed and the performance.**
- 3) SFDR: EU Sustainable Finance Disclosure Regulation. Information accurate at time of publishing.
- 4) The stated ongoing charges reflect the total expense ratio (TER) of the Fund. In the event of a new issue, a short financial year or a fee adjustment, the Fund's ongoing charges will be estimated. Ongoing charges may vary from year to year and do not include transaction costs for the purchase or sale of assets for the Fund. In addition, no costs resulting from any performance-related remuneration are included in ongoing charges.
- 5) The Sharpe ratio states the relationship between the return generated by the fund and the investment risk. The fund's excess return versus the risk-free market rate is compared to volatility. Negative values are not meaningful.
- 6) Volatility measures the fluctuation range of the fund's performance over a specified period of time.
- 7) Measure of the proportion of fund assets that is invested differently from the benchmark.
- 8) The dividend yield corresponds to the expected dividend divided by the current price of the share, expressed as a percentage. (eDiv/share price) where: eDiv = product of the last dividend payment and the number of expected dividend payments per year (e.g. the expected dividend for a share with quarterly dividend payment corresponds to the dividend for the last quarter times four). The dividend yield depends both on the amount of the dividend and the current price of the share. Both these key variables may be subject to constant change. The dividend yield is only a snapshot based on the current amount of the dividend and the current share price; **as a result, it is not suitable as an indicator of the future performance of an equity fund.**
- 9) This is for guidance only and not indicative of future allocation.

Disclaimer

Investing involves risk. The value of an investment and the income from it may fall as well as rise and investors might not get back the full amount invested. Allianz Total Return Asian Equity Fund is a sub-fund of Allianz International Investment Funds, an open-ended investment company with variable capital with limited liability organised under the laws of England and Wales. The value of the units/shares which belong to the Unit/Share Classes of the Sub-Fund that are denominated in the base currency may be subject to a strongly increased volatility. The volatility of other Unit/Share Classes may be different. Past performance does not predict future returns. If the currency in which the past performance is displayed differs from the currency of the country in which the investor resides, then the investor should be aware that due to the exchange rate fluctuations the performance shown may be higher or lower if converted into the investor's local currency. This is for information only and not to be construed as a solicitation or an invitation to make an offer, to conclude a contract, or to buy or sell any securities. The products or securities described herein may not be available for sale in all jurisdictions or to certain categories of investors. This is for distribution only as permitted by applicable law and in particular not available to residents and/or nationals of the USA.
