

MGTS Future Money Income Fund

>Objective

The Sub-fund is intended to provide increasing income (measured by annual monetary gross distributions per share per annum) and a total return after fees of at least the rate of inflation, measured by the UK Consumer Price Index (CPI), plus 1% (per annum) over any five-year period. For these purposes, total return means the amount of capital and income an investor earns.

>Asset Allocation

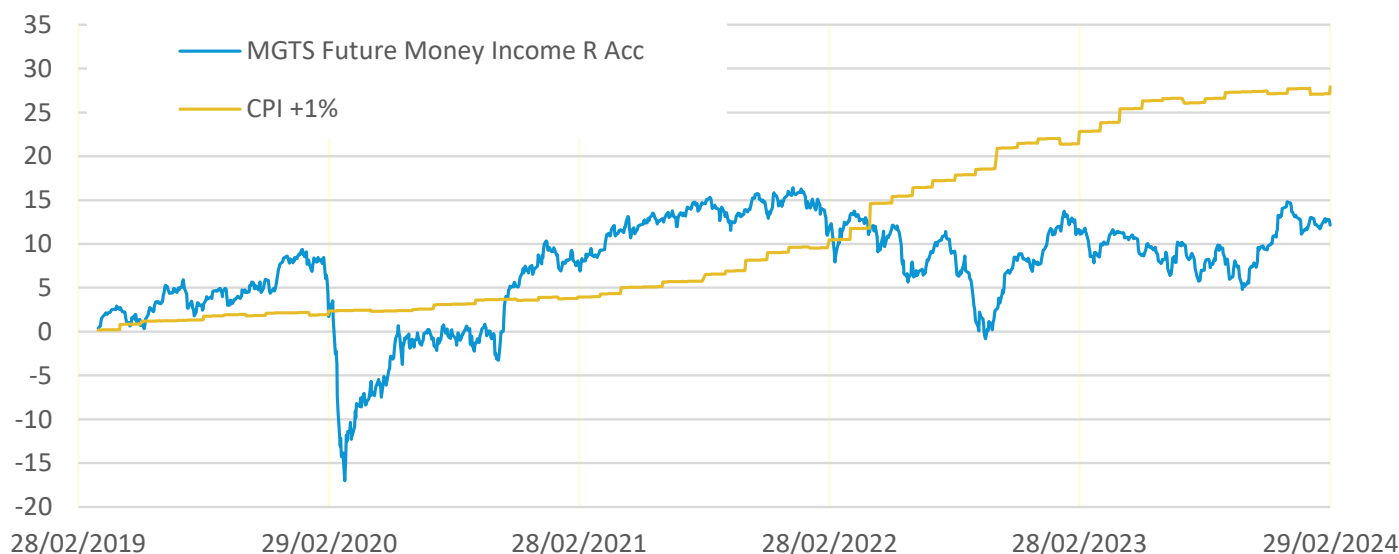

>Performance

The Sub-fund has a performance target of UK CPI as detailed in the objective above. The Sub-fund is designed to protect or grow the real value of investments over the long-term, which means that the growth should be at least equal to the rate of inflation. Performance may differ significantly in profile to the rate of inflation and therefore it is not expected that the target benchmark will be an appropriate direct comparison over periods shorter than the objectives timeframe.

The IA (Investment Association) Mixed Investment 20-60% Shares Sector is used as a comparator. This is considered appropriate for investors to use when comparing performance as the strategy results in the Sub-fund meeting the definition of this sector.

Performance is based on MGTS Future Money Income Fund R Acc. The performance for other share classes may differ due to the difference in charges.
