AS AT 30 SEPTEMBER 2021

Investment objective

The fund aims to provide income, while seeking to maintain capital over the long term.

Investment strategy

The starting point for the Manager's investment process is identifying the best mix of asset classes to create a strategic asset allocation (SAA) customised for each 7IM risk profile. The SAA is then adapted to financial markets to enhance return and reduce volatility on a tactical basis using 7IM's tactical asset allocation process (TAA) making temporary and measured departures from the SAA. The fund's portfolio of assets is constructed predominantly with passive securities. By Asset Allocated Passive (AAP) we mean that we actively choose third party managers or securities for their own expertise in selecting particular assets, where their objective is to closely track a pre-determined index.
