

Mirabaud - UK Equity High Alpha D dist. GBP

30 November 2023

Investment Overview

Unconstrained UK equity all-cap strategy with high active share – we invest where we find opportunity, quality and value. The investment team looks for fresh opportunities in businesses offering scalability, optionality and low risk (with an emphasis on paying the right price). Independent risk reporting includes portfolio scenario and stress testing with ex-ante and ex-post risk guidance. Proprietary ESG scores are typically well ahead of the benchmark, with ongoing engagement efforts to drive further company improvements.

Approach to Sustainability

We aim to ensure the companies we own for the long term are fair to all stakeholders and we take pride in the portfolio's extremely low carbon footprint. Climate change risk is critical in our analysis when choosing companies for our portfolio and active ownership allows us to inspire and influence positive change. We follow a three-step process: 1. Exclusion of companies operating in controversial sectors, and companies involved in recent major controversies; 2. Positive screening - aiming to minimise downside risk of the portfolio by only including companies with the top 80% ESG scores; 3. In-depth analysis of material ESG issues for all companies, along with ongoing engagement.

Risk Information

Investments in equities are subject to market risks which will not be hedged. The fund may invest in securities which are less liquid because buyers/sellers are not always in sufficient numbers to trade these securities readily or because they hold a large portion of their shares. The fund may invest beyond its primary universe which may result in additional risks. Investments in share-classes that are not denominated in the fund base currency are exposed to losses and gains caused by currency fluctuations. Cash placed in time deposits or money market funds are exposed to their issuer's default risk.
