

AS AT 31 OCTOBER 2021

## Investment objective

The fund aims to provide a balance of income and capital growth.

## Investment strategy

The starting point for the Manager's investment process is identifying the best mix of asset classes to create a strategic asset allocation (SAA) customised for each 7IM risk profile. The SAA is then adapted to financial markets to enhance return and reduce volatility on a tactical basis using 7IM's tactical asset allocation process (TAA) making temporary and measured departures from the SAA. The fund's portfolio of assets is constructed by holding a blend of funds and direct investments. The funds are selected using our own expertise and can either be passively invested, where their objective is to closely track a pre-determined index, or actively managed whereby the Manager will use its own expertise in selecting particular assets.

\*7IM's funds are mapped against a selection of third party risk profiling tools to assist advisers as part of suitability assessments for clients. Such tools are however only one aspect of an adviser's suitability process and other such as the clients' investment term / horizon and knowledge and experience should also be considered. The methodology of third party risk profiling tools is not endorsed by 7IM and individual fund risk profiling scores may not correspond precisely to the risk indicators in the 7IM fund literature.
