

# abrdn Global Inflation-Linked Bond Fund

Platform 1 Inc GBP

29 February 2024

## Objective

To generate income and some growth over the long term (5 years or more) by investing in inflation-linked bonds.

**Performance Target:** to achieve the return of the Bloomberg World Government Inflation Linked Index (Hedged to GBP), plus 0.5% per annum (before charges). There is no certainty or promise that the Performance Target will be achieved.

The Bloomberg World Government Inflation Linked Index (Hedged to GBP) (the "Index") is a representative index of the global market for inflation-linked bonds.

## Portfolio securities

- The fund will invest at least 70% in inflation-linked government bonds (which are like loans to governments that pay a variable interest rate linked to inflation) issued anywhere in the world.
- The fund may also invest in inflation-linked and non-inflation-linked investment grade corporate bonds (which are like loans to companies that pay interest and are typically regarded as having a low default risk) and other bonds issued anywhere in the world. The fund will employ techniques to reduce (hedge) risk related to currency movements on non-sterling bonds.
- The fund may also invest in other funds (including those managed by abrdn), cash and assets that can be turned into cash quickly.

Performance Data: Share Class Platform 1 Inc GBP.

Benchmark history: Performance target – Bloomberg World Government Inflation Linked (Hedged to GBP) +0.50%

Source: abrdn (Fund & Benchmark) and Morningstar (Sector). Basis: Total Return, NAV to NAV, UK Net/Gross Income Reinvested.

"Fund (Net)" refers to the actual unit price performance of the shareclass shown; "Fund(Gross)" adds back charges such as the annual management charge to present performance on the same basis as the performance target / performance comparator / portfolio constraining benchmark. These figures do not include the initial charge; if this is paid it will reduce performance from that shown.

**Past performance is not a guide to future returns and future returns are not guaranteed.**

Derivative usage

- The fund will make routine use of derivatives to reduce risk, reduce cost and/ or generate additional income or growth consistent with the risk profile of the fund.
- Derivatives are linked to the value of other assets. In other words, they derive their price from one or more underlying asset. They can generate returns when the value of these underlying assets rise (long positions) or fall (short positions).
- Derivatives include instruments used to manage expected changes in interest rates, inflation, currencies or creditworthiness of corporations or governments.

To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Key Investor Information Documents and Prospectus which are available on our website [www.abrdn.com](http://www.abrdn.com) The Prospectus also contains a glossary of key terms used in this document.

<sup>1</sup>Yield to Maturity as at 29/02/2024 is the yield that would be realised on a bond or other debt instrument if the security was held until the maturity date.

<sup>2</sup>These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

<sup>3</sup>The Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 0.40% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds.
