

Aberdeen Diversified Income Fund

I Inc

Performance Data and Analytics to 31 March 2019

Objectives and investment policy

Objective: To generate income and increase the value of the shareholder's investment over the long term (income and capital growth).

Investment policy: The Fund invests more than 50% of its total net assets in worldwide equities and bonds, with the remainder invested in other asset classes such as cash, property and infrastructure. The Fund's bond investments may be issued by governments, corporations and other large organisations, and may be any credit quality. The Fund may gain exposure to some assets by investing in other Funds (mainly those managed by the investment adviser or its affiliates).

The Fund has a wide range of investment powers. The Investment Manager has the flexibility to amend the investment allocation between different asset classes, in line with its view on markets, in pursuit of the investment objective.

Fund manager's report

Market review

Global equity markets were modestly positive over the month. In the US, the Federal Reserve's expectation that it will not raise interest rates in 2019 supported share prices. In Europe, sentiment was more subdued as concerns about slowing economic growth and trade uncertainty weighed on performance.

Local Currency Emerging Market debt experienced mixed performance in March. While bond prices remained resilient over the month, Emerging Market currencies depreciated on aggregate. The most notable negative currency contributions came from Turkey, Brazil and Argentina.

Portfolio changes

We increased our exposure to infrastructure through allocations to The Renewable Infrastructure Group and Greencoat Renewables, which both raised capital via attractively priced placings. This was funded from a reduction in cash.

Historic Yield	5.23% (I Inc) ^a

^aThe Historic Yield reflects distributions declared over the past twelve months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. The fund charges 100% of the annual management charge to capital. This has the effect of increasing distributions for the year and constraining the fund's capital performance to an equivalent extent.

^cThe Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the Funds. It is made up of the Annual Management Charge (AMC) of 0.60% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the Funds. The Ongoing Charges figure can help you compare the annual operating expenses of different Funds.

Important information

Risk factors you should consider before investing:

- The value of investments and the income from them can go down as well as up and investors may get back less than the amount invested.
- Bonds: Bond valuations are affected by changes in interest rates, inflation and the creditworthiness of the bond issuer. There is a risk that a bond issuer may not be able to repay the money they borrowed nor make their required interest payments. This risk increases for bonds with lower credit ratings. Where a bond market has a low number of buyers and/or a high number of sellers, it may be harder to sell particular bonds at an anticipated price and/or in a timely manner.
- Derivatives: This Fund can use derivatives in order to meet its investment objective. The use of derivatives may result in greater fluctuations in the value of the Fund, and may increase the magnitude of any losses.
- Emerging Markets: Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries and this may mean your money is at greater risk.
- Exchange Rates: The Fund may have holdings which are denominated in different currencies and may be affected by movements in exchange rates. Consequently, the value of the Fund's investments and the income from them may rise or fall in line with exchange rates.
- REITs: The Fund may invest in real estate investment trusts (REITs) which themselves invest directly in real estate. Under adverse market or economic conditions, such assets may become difficult to buy or sell or experience a drop in value.
- A full list of risks applicable to this Fund can be found in the Prospectus.
