Rathbone Global Opportunities Fund

Investment objective

We aim to deliver a greater total return than the Investment Association (IA) Global Sector, after fees, over any five-year period. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (dividend payments). We use the IA Global sector as a target for our fund's return because we aim to achieve a better return than the average of funds that are similar to ours.

We compare our asset allocation to the FTSE World Index to give you an indication of how our fund is positioned against the global stock market.

Investment strategy

This is a stock-picking fund, which means we invest in a small number of global stocks. We search developed countries for innovative and scalable businesses that are growing fast and shaking up their industries.

To be successful, we believe businesses have to offer something that others can't match - a star quality. They must be easy to understand, different to their competitors, durable to change and difficult to imitate. Companies must have a plan to grow rapidly without running out of money or overstretching their resources. Our speciality is spotting these businesses before they are household names.

We buy companies of all sizes, but our sweet spot is mid-sized growth companies in developed markets. We avoid investing in companies listed in emerging markets.

We avoid investing in businesses which have previously performed poorly, preferring those with an unblemished past. We don't invest in unpredictable sectors with poor growth prospects. To reduce risk, we hold a defensive bucket of companies with slow and steady growth that should be less sensitive to the economy.
