OEIC

Scottish Widows European Select Growth A Acc

Fund Objective

To provide capital growth through investment in a select portfolio, typically 45 to 60 holdings, of Continental European shares. The benchmark index for the Fund is the MSCI Europe ex UK Index (the "Index"). The Fund is actively managed by the Investment Adviser who chooses investments with the aim of outperforming the Index by 3% per annum on a rolling 3 year basis, before deduction of fees. The MSCI Europe ex UK Index has been selected as an appropriate benchmark as it provides a representation of the returns of securities in the European equities market, excluding the UK. For further information on this fund's policy and objectives, please refer to the Key Investor Information Document or the Prospectus. These documents can be accessed via the following link:

Past Performance

European Select Growth

Benchmark

The returns shown in the performance table illustrate past performance of the Fund and its benchmark index. The outperformance target is applied to the index and we illustrate it in the figures from 7th August 2019 onwards. Prior to this date the Fund aimed to outperform its benchmark.

Past performance is not a guide to future performance. Investment value and income from it may fall as well as rise, as a result of market and currency movements. You may not get back the amount originally invested.

Discrete Performance

| | 31/12/2022 - 31/12/2023 | 31/12/2021 - 31/12/2022 | 31/12/2020 - 31/12/2021 | 31/12/2019 - 31/12/2020 | 31/12/2018 - 31/12/2019 |
|--|-------------------------|-------------------------|-------------------------|-------------------------|-------------------------|
| Scottish Widows European Select Growth A Acc | 7.0% | -8.8% | 13.6% | 7.1% | 25.5% |
| Benchmark | 18.3% | -4.9% | 20.2% | 10.7% | 21.4% |

Performance figures are in £ Sterling on a single pricing basis, with income (where applicable) reinvested net of UK tax and net of total annual fund charges. These figures do not include any initial charge or other product charge(s) that may be applicable.

Quarterly Fund Manager Review

The final quarter of the year was a strong one for eurozone shares, boosted by expectations that there may be no further interest rate rises. The MSCI EMU index advanced 7.8%. Top gaining sectors included real estate and information technology, while healthcare and energy were the two main laggards, registering negative returns. Shares were supported by softer inflation figures from both the eurozone and the US, which raised hopes that interest rates may not only have peaked, but that cuts could soon be on the way in 2024. Euro area annual inflation fell to 2.4% in November from 2.9% in October. A year previously, the annual inflation rate was 10.1%. Higher interest rates have weighed on the eurozone economy. Eurozone GDP fell by 0.1% quarter-on-quarter in Q3, Eurostat data showed. The HCOB flash eurozone purchasing managers' index (PMI) fell to 47.0 in December. This suggests that the region's economy is likely to have contracted in Q4 as well. (The PMI indices are based on survey data from companies in the manufacturing and services sectors. A reading below 50 indicates contraction, while above 50 signals expansion.) Most sectors rose amid optimism over future rate cuts. The real estate sector advanced strongly amid the prospect of a cheaper cost of debt. IT stocks, the value of which is based on future cash flows and earnings, also performed well. Other economically sensitive sectors such as industrials and materials registered strong gains. By contrast, the energy sector fell amid weaker oil prices. Stock-specific factors weighed on the healthcare sector.
