

M&G Index Tracker Fund

Sterling Class A – Accumulation shares

Monthly Fund Review as at 31 March 2024
For investment professionals only

Fund description

The fund is designed to track the performance of the FTSE All-Share Index, gross of the Ongoing Charge Figure. The return received by shareholders will be reduced by the effects of charges. The index represents a broad spread of small, medium and large companies listed on the London Stock Exchange. The fund seeks to hold all the companies in the index and matches closely the weight that each stock represents in the index.

The main risks associated with this fund

For any past performance shown, please note that past performance is not a guide to future performance. The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested. Further risk factors that apply to the fund can be found in the fund's Prospectus.

ESG Standard Glossary

Additional ESG specifications: In the context of M&G, these are funds managed with an explicit ESG objective, outcome or in accordance with specific ESG criteria, and will have a number of minimum exclusions in place.

Engagement: Interaction with company management on various financial and non-financial, including ESG, issues. Engagement allows investors to better understand how a company is undertaking its operations and how it is interacting with its stakeholders, as well as advising on and influencing company behaviour and disclosures where appropriate.

ESG integration: Describes the explicit and systematic inclusion of Environmental, Social and Governance factors in investment analysis and investment decisions. It underpins a responsible investment approach, and allows investors to better manage risk and generate sustainable, long-term returns.

Exclusions: The exclusion or restriction of investments based on the sector in which they operate, the products or services they provide or for other specific criteria, i.e. they are deemed to be in breach of the United Nations Global Compact principles on human rights, labour the environment and anti-corruption.

Voting: As the partial owners of a company, shareholders have the right to vote on resolutions put forward at a company's annual general meeting. These resolutions include the re-election of directors, executive remuneration and business strategy, among others, and may include resolutions put forward by shareholders.

Explanation of our climate metrics

The Weighted Average Carbon Intensity (WACI) is the metric used to report our funds' carbon emissions. It is a measure of how much CO2 is being emitted per US\$ million of sales by each company that the fund invests in. This can be used to determine the likely effect a company is having on the environment. It can also help to compare the impact different companies have on the environment, and to compare companies against the broad market or the financial benchmark for the fund. However, this metric does not take into account the difference in carbon characteristics among sectors.

The WACI metric is one of many greenhouse gas emissions data points, each offering a different aspect of analysis on climate impact. M&G have selected this metric as it is applicable to multi-asset, equity and fixed income funds and it is aligned to the recommendations from the Taskforce for Climate Related Financial Disclosures (TCFD). It has also been chosen to align with M&G's groupwide target of transparency when it comes to the disclosure of climate emissions.

At M&G we currently use MSCI as our main third-party data provider for carbon intensity data as we consider its coverage to be the broadest of the current providers. As with any mass data collection, there are methodology limitations; this also applies to MSCI. We make every effort to check its data and are currently building our own tools which will use a variety of data sources to gather and map the carbon emissions of our funds.

For the avoidance of doubt, this fund is not managed to a carbon emission objective and, the benchmark WACI (should funds have a benchmark) has been included for information purposes only.

Important information

With effect from November 2023, we are reporting using our internal accounting book of record (ABOR) moving away from the investment book of record (IBOR) used for reporting up to October 2023.

On 12 December 2023, BlackRock Investment Management (UK) was appointed Sub-Investment Manager for the Fund. This means that BlackRock is now responsible for making investment decisions on behalf of the Fund. The Fund's Investment Objective and Policy remain the same.

The M&G Index Tracker Fund is a sub-fund of M&G Investment Funds (2).
