

JOHCM UK Dynamic Fund

Fund overview

- The Fund aims to generate long-term capital growth through active management of a portfolio of listed UK equities
- Senior Fund Manager Alex Savvides believes misunderstanding of corporate change by the stock market regularly presents opportunities for the patient, disciplined and unemotional investor
- His process aims to profit from understanding change and investing where there is the highest probability of success but with the highest cash-based valuation support
- Benchmark: FTSE All-Share Total Return Index
- The use of the Index does not limit the investment decisions of the fund manager therefore the shareholdings of the Fund may differ significantly from those of the Index
- Please see the [Prospectus/KIID/KID](#) for further information. Please ensure you read and understand these documents before making an investment and wherever possible obtain professional advice

The value of an investment and the income from it can fall as well as rise as a result of market and currency fluctuations and you may not get back the amount originally invested. For further information on risks please refer to the Fund's KIID and/or the Prospectus. The Fund's investment include shares in small-cap companies and these tend to be traded less frequently and in lower volumes than larger companies making them potentially less liquid and more volatile. The annual management charge is deducted from the capital of the Fund. This will increase the income from the Fund but may constrain or erode potential for capital growth.
