

Legal & General Asia Pacific Equity Income Fund

Unit Trust (UK UCITS compliant) I-Class GBP

Base currency: GBP

Domicile: UK

FUND AIM

The objective of the Fund is to provide income in excess of the income generated by the FTSE Asia Pacific ex-Japan TR Net Index, the "Benchmark Index", measured before the deduction of any charges and over rolling five year periods, whilst aiming for capital growth over the long term (at least five years). Please note, invested capital is at risk and there is no guarantee that the above will be attained over any time period.

RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

The fund is in category 5 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time.

For more information, please refer to the Key Risks section on page 3.

WHO IS THIS FUND FOR?

- This fund is designed for investors looking for a combination of Income and growth from an investment in company shares from the Asian Pacific region (excluding Japan but including Australia and New Zealand).
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from sterling (British pounds). Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- We may take some or all of the ongoing charges from the fund's capital rather than the fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the fund.
