

## Investment objectives

The Ardevora Global Long-only Equity Fund's investment objective is to achieve long-term capital appreciation.

## Investment approach

We think picking good stocks is about recognizing where "the market" can be wrong. We picture the market as made up of three sets of people: company managers, financial analysts and investors. We watch the behavior of these people for signs of bias. For management, we look for indications of hubris, denial and excessive risk taking. For analysts, we look for signs of over confidence, blinkering, and belief in a good sounding story. For investors, we look for signs of excessive anxiety, or over-exuberance, and a fixation on recent emotive events. We keep away from these people, and judge them by observable facts stock prices, valuations, forecasts, company accounts and analyst reports.
