OCTOBER 2023 / FACTSHEET

KEY RISK

During exceptional market conditions there may be insufficient buyers and sellers to allow the Fund to buy and sell investments, which could affect the Fund's ability to meet investors' redemption requests. Losses may occur if an organisation through which we buy an asset fails to meet its obligations. Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care. Fund investments in derivatives are sensitive to changes in the value of the underlying asset on which they are based and their use may result in losses greater than the amount originally invested. Fund investments in overseas assets may lose value due to movements in foreign exchange rates. Fund investments in equities may be subject to significant fluctuations in value. The Fund can hold smaller company shares which can be more difficult to buy and sell and more volatile than those of larger companies. Region specific funds have a narrower focus than those which invest broadly across markets and are therefore more risky. Further information on the Fund's risks can be found in the offering (constitutional) documents.

OBJECTIVE**

To provide a total return, including both capital growth and dividend income (after fees have been deducted), in excess of the MSCI Europe ex UK (Total Net Return) Index over a rolling five year period by investing in equity and equity related securities in Europe excluding the United Kingdom.

STRATEGY & MARKETING OPPORTUNITY

The investment team builds a focused, high conviction portfolio of carefully selected investments with the aim of producing superior risk-adjusted returns.

- European Equities trade at a significant discount to global peers, particularly relative to the U.S.
- Europe is fertile ground for stock-pickers due to its highly diversified, liquid equity market presenting opportunities for investors.

PAST PERFORMANCE DOES NOT PREDICT FUTURE RETURNS. An investment entails a risk of loss. Returns for periods greater than one year are annualized. If you are investing in a different currency to the base currency of the fund, your returns may increase or decrease as a result of currency fluctuations.

Source: Morningstar/Barings: Performance figures are shown in GBP on a NAV per unit basis, with gross income reinvested. The Benchmark is used for risk management and performance comparison purposes. The investment manager has complete discretion in making investments and is not constrained by the Benchmark.

- Performance figures prior to February 1, 2013 are hypothetical. The hypothetical fund performance is based on the A USD Inc share class. This has been grossed up by 0.75%. (The difference between the A and the I share class fees) to create a proxy net I class calculated from the inception of the fund. The proxy gross I class has been grossed up by the I class OCF.
- The benchmark is MSCI Europe ex UK Total, Net Return Index.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Barings European Growth Trust I GBP Inc share was rated against the following numbers of EAA Fund Europe ex-UK Equity investments over the following time periods: 565 investments in the last three years, 492 investments in the last five years, and 325 investments in the last ten years. **Past performance is no guarantee of future results.**

Morningstar Rating is for the I share class only; other classes may have different performance characteristics.
