

Invesco Tactical Bond Fund (UK)

Z-Accumulation Shares | SEDOL: B8N45T8 | ISIN Code GB00B8N45T82 | Bloomberg code INOAZGB:LN

Why invest in this fund

- 1 Our fund has a flexible approach to investing and aims to achieve income and capital growth over the medium to long-term.
- 2 Our team considers a broad universe to capture opportunities. The portfolio can hold all types of bonds within wide ranges, including exposure to higher yielding emerging market bonds. It also can invest in cash.
- 3 Our fund can be defensively positioned when markets do not offer value. When there's lots of risk in the market the fund can hold large allocations of cash. Equally when there's opportunities in the market, we can invest in bonds that potentially offer higher rewards.

What this fund does

The fund has a flexible approach that aims to align risk and reward across bond markets as the opportunity set changes. This means that at times when we think that risk is not well rewarded the fund can hold large allocations to cash or cash equivalents. Equally, when we do think there is opportunity, we can quickly dial up the fund's risk. This flexibility is central to the fund's approach.

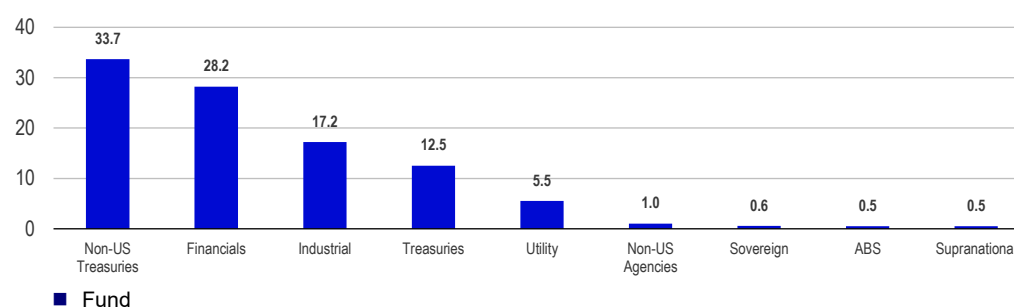

Fund objective

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund has a flexible allocation to corporate and government debt securities (including investment grade, non-investment grade and unrated) and cash. Depending on market conditions the Fund may invest up to 100% of its net assets in cash, cash equivalents, short-term debt securities and money-market instruments. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, collective investment schemes (including funds managed by the Invesco group) and deposits.

BB	13.39
B	0.12
Not rated	0.62

Investment risks

- The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.
- The debt securities that the Fund invests in may not always make interest and other payments and nor is the solvency of the issuers guaranteed. Market conditions, such as a decrease in market liquidity, may mean that the Fund may not be able to buy or sell debt securities at their true value. These risks increase where the Fund invests in high yield, or lower credit quality, bonds.
- The Fund has the ability to make significant use of financial derivatives (complex instruments) which may result in the Fund being leveraged and can result in large fluctuations in the value of the Fund. Leverage on certain types of transactions including derivatives may impair the Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Fund not to achieve its intended objective. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the Fund being exposed to a greater loss than the initial investment.
- As the Fund has wide discretion to dynamically allocate across the debt securities spectrum and between that asset class and cash, the risks relevant to the Fund will fluctuate over time, which may result in periodic changes to the Fund's risk profile.
- The Fund may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events.
- The Fund's performance may be adversely affected by variations in interest rates.
- The Fund has the ability to invest more than 35% of the value in Government and public securities issued or guaranteed by a single body.

Five year performance

Bond maturity (%)

20+ Yrs	28.33
16-20 Yrs	0.97
11-16 Yrs	3.02
7-11 Yrs	21.05

Important information

Views and opinions are based on current market conditions and are subject to change.

This is marketing material and not financial advice. It is not intended as a recommendation to buy or sell any particular asset class, security or strategy. Regulatory requirements that require impartiality of investment/investment strategy recommendations are therefore not applicable nor are any prohibitions to trade before publication. If investors are unsure if this product is suitable for them, they should seek advice from a financial adviser.

For the most up to date information on our funds, please refer to the relevant fund and share class-specific Key Investor Information Documents, the Supplementary Information Document, the financial reports and the Prospectus, which are available using the contact details shown.

The yield shown is expressed as a % per annum of the current NAV of the fund. It is an estimate for the next 12 months, assuming that the fund's portfolio remains unchanged and there are no defaults or deferrals of coupon payments or capital repayments. The yield is not guaranteed. Nor does it reflect any charges. Investors may be subject to tax on distributions.

Who is this fund for?

The fund might be right for you if you:

Are a private or professional investor looking for income and growth over the medium to long term.
Are able to make an informed investment decision based on this document and the Key Investor Information Document (KIID).

Are willing to accept that your capital is at risk and you may not get back the amount invested.

The fund will not be right for you if you:

Require capital protection or have no appetite for risk.

Cost and charges of the Fund

For a full breakdown of the charges that apply to each share class of the fund, please refer to our ICVC Costs & Charges document www.invesco.com/uk/icvc-charges.

Glossary

ACR/ Annual Compound Return: Compound returns represent the cumulative effect that gains and losses have on invested capital over time. Annual Compound Return is the annual rate of return that would be required for an investment to grow from its starting balance to its ending balance.

Benchmark: A standard against which an investment fund or portfolio is measured to give an indication of relative performance.

Collective investment schemes: Pooled investment funds that are managed by professional investment managers.

Contingent convertible bonds: A fixed income instrument that is convertible into stock if a pre-specified event occurs.

Credit Rating/ Quality: The 'quality' of a bond is an indication of the bond issuer's financial strength and/or its ability to pay a bond's face value when it reaches maturity. Quality is rated using a AAA (higher quality) – CCC (lower quality) system.

Distribution frequency: How often dividends and/or interest generated by an investment product are disbursed to investors.

Distribution yield: A measurement of the annual income payments made to fund shareholders as a percentage of its share price.

Duration: The weighted average time, in years, it could take for an investor to recoup a bond's value through future cash flows, such as interest and principal payment.

Effective maturity: The average time it takes for a bond's cash flows, including interest and principal payments, to be realised.

Financial derivatives: Financial contracts whose value depends on an underlying asset or benchmark.

High yield bond: Bonds rated lower than investment grade by the major credit ratings agencies.

Holdings: The contents of an investment portfolio or fund, including any products like equities, bonds or ETFs.

ICVC: Investment Company with Variable Capital. A type of collective investment portfolio that invests in different equities, bonds and other securities.

Index: A collection of stocks chosen to represent the performance of a particular market or sector, e.g. FTSE 100 or S&P 500.

Investment category: The type of bond issuer relating to bonds held in the portfolio, e.g. corporate, or government issued.

Investment grade bond: Bonds rated Baa3/BBB- or better by the major credit ratings agencies.

Leverage: The ratio of a company's debt to the value of its common stock.

Maturity: How far in the future the bond issuer is set to pay back everything they owe to bondholder

Money market instruments: Financial instruments that are issued with a maturity of one year or less.

Yield to maturity: The total return anticipated on a bond if the bond is held until it matures.
