## Risk factors

---

This fund is intended to be a long-term investment and your capital is at risk. Any investment objective, performance benchmark and yield information should not be considered as an assurance or guarantee of the performance of the fund or any part of it. An initial charge reduces the amount available for investment. Investors should be aware that funds denominated in a currency other than investors' home state currency are subject to currency fluctuations which may decrease returns. Please be aware that each fund presents its own risk profile. Material risks for this fund are: Credit, Interest Rate and Liquidity. Please read the KIID for an explanation and refer to the prospectus for information about all relevant risks.

Past performance is not a guide to future performance. The value of investments and the income from them may go down as well as up and is not guaranteed. Outcomes, including the payment of income, are not guaranteed.

The Distribution Yield is also the Underlying Yield for this fund.

The Distribution Yield reflects the amounts that may be expected to be distributed over the next twelve months as a percentage of the mid-market unit price of the fund as at the date shown. It is based on a snapshot of the portfolio on that day. It does not include any preliminary charge and investors may be subject to tax on distributions. We calculate yields in compliance with the industry standard formula we are obliged to use which takes no account of potential future defaults. This may mean that, depending on future economic factors, the actual yield could be less than those shown.

The Underlying Yield reflects the annualised income net of expenses of the fund (calculated in accordance with relevant accounting standards) as a percentage of the mid-market unit price of the fund as at the date shown. It is based on a snapshot of the portfolio on that day. It does not include any preliminary charge and investors may be subject to tax on distributions.

Fund charges are deducted from income but will be deducted from capital where income is insufficient to cover charges.
