The risk indicator is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class. The risk and reward category shown above is not guaranteed to remain unchanged and may change over time. A Share Class with the lowest risk rating does not mean a risk-free investment. See Key Investor Information Document (KIID) for details.

As at 10/12/18 the investment objective of the Sub-Fund was changed.

Performance information

Source: J.P.Morgan Asset Management. Share class performance shown is based on the quoted price of the share class, assumes any net income was reinvested, and includes ongoing charges but not any entry or exit fees.

Indices do not include fees or operating expenses and you cannot invest in them.

The Yield reflects net distributions declared over the past 12 months as a percentage of the quoted price at the date shown. It does not include the Entry charge and investors may be subject to tax on their distributions. Where a portion of the fund’s expenses are charged to capital this has the effect of increasing the distribution for the year and constraining the fund’s capital performance to an equivalent extent.

Prior to 01/11/13 the benchmark was Russell 2000 Growth Index (Net of 30% withholding tax).

Definitions

- NAV** Net Asset Value of a fund’s assets less its liabilities per Share.
- Quoted Price** The single price at which all client orders are executed.
- Morningstar Medalist Rating™** is the summary expression of Morningstar’s forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative.
- Analyst-Driven %** Displays the percentage of Analyst’s input into the overall rating assignment, including direct analyst coverage and inheritance of an analyst-rated pillar.
- Data Coverage %** Displays the percentage of available input data for rating calculation at the Pillar level.
- Correlation** measures the strength and direction of the relationship between movements in fund and benchmark returns. A correlation of 1.00 indicates that fund and benchmark returns move in lockstep in the same direction.
- Alpha (%)** a measure of excess return generated by a manager compared to the benchmark. An alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%.
- Beta** measures a fund’s sensitivity to market movements (as represented by the fund’s benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant. Usually the higher betas represent riskier investments.
- Annualised volatility (%)** measures the extent to which returns vary up and down over a given period.
- Sharpe ratio** performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.
