Fund objectives and investment policy

The Fund is actively managed and invests at least 80% of its assets in a concentrated range of equity and equity related securities of companies worldwide which meet the Investment Manager's sustainability criteria (please see the Fund Characteristics section for more details).

The Fund typically holds 30 to 70 companies.

The Fund focuses on companies that have certain "Value" characteristics. Value is assessed by looking at indicators such as cash flows, dividends and earnings to identify securities which the manager believes have been undervalued by the market. The Fund maintains a higher overall sustainability score than the MSCI World (Net Total Return) index, based on the Investment Manager's rating system. More details on the investment process used to achieve this can be found in the Fund Characteristics section. The Fund does not directly invest in certain activities, industries or groups of issuers above certain limits listed under "Sustainability Information" on the Fund's webpage, accessed via www.schroders.com/en/uk/private-investor/gfc

The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria (please see the Fund Characteristics section for more details).

The Fund may invest in companies that the Investment Manager believes will improve their sustainability practices within a reasonable timeframe, typically up to three years.

The Investment Manager may also engage with companies held by the Fund to challenge identified areas of weakness on sustainability issues. More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the website <https://www.schroders.com/en/uk/private-investor/strategic-capabilities/sustainability/>

The Fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

Above is the Investment Objective of the fund. For details on the full fund's Investment Policy please see the KIID. The Fund maintains a higher overall sustainability score than the MSCI World (Net Total Return) index, based on the Investment Manager's rating system.

Relevant risks associated with an investment in this fund are shown below and should be carefully considered before making any investment. Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

Risk considerations

Concentration risk: The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down.

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Higher volatility risk: The price of this fund may be volatile as it may take higher risks in search of higher rewards, meaning the price may go up and down to a greater extent.

IBOR risk: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference interest rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Synthetic risk & reward indicator (SRRI)

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed. Please see the Key Investor Information Document for more information.

Z Accumulation GBP | Data as at 29.02.2024

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Market risk: The value of investments can go up and down and an investor may not get back the amount initially invested.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Sustainable Investing Risk: The fund applies sustainability criteria in its selection of investments. This investment focus may limit the fund's exposure to companies, industries or sectors and the fund may forego investment opportunities that do not align with its sustainability criteria chosen by the investment manager. As investors may differ in their views of what constitutes sustainability, the fund may invest in companies that do not reflect the beliefs or values of any particular investor.

Proprietary Sustainability Metrics %

Overall Impact

Data as at 29.02.2024

The sustainability scores of the fund and the benchmark are shown. The benchmark is the MSCI World (Net Total Return) index.

The Schroders Impact score is based on Schroders' proprietary tool, SustainEx™. SustainEx™ provides an estimate of the potential societal or environmental impact that may be created by the companies and other issuers in which the fund is invested. The result is expressed as a notional percentage (positive or negative) of sales of the relevant underlying companies and other issuers. For example, a SustainEx™ score of +2% would mean a company contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales.

We calculate SustainEx™ scores for companies and other issuers in the fund to arrive at the total fund score.

The "Overall Impact" shown is a measure of the fund's estimated impact compared to that of its benchmark, in each case calculated as a relative notional percentage as described above.

The "Impact on People" and "Impact on Planet" measure the fund's estimated underlying benefits and harms, as compared to its benchmark, in each case calculated as a relative notional percentage as described above.

Overall Impact On: People

Climate dashboard

Carbon Metrics

● Fund ● Benchmark

Energy Exposure

● Fund ● Benchmark

Source: MSCI. Carbon Intensity is based on reported scope 1 & 2 emissions. Fossil Fuel Exposure charts for sub-funds apply a revenue-based exclusion on companies operating in the coal sector. Please refer to the fund prospectus for more details on exclusions. Benchmark used is the MSCI World (Net Total Return) index. Source: MSCI. The graphs above include the Weighted Average Carbon Intensity (WACI), carbon footprint and energy exposure of the fund and its benchmark, where applicable. WACI and carbon footprint are based on Scope 1, 2 and 3 emissions. WACI measures the carbon-intensity of the portfolio by assessing the ratio of emissions to revenue generated from underlying investee companies. Carbon footprint normalises the total carbon emissions of the portfolio to its market value. When calculating carbon metrics, Schroders will exclude neutral assets (such as cash) and other non-eligible assets. This means that Schroders aggregates company-level GHG emissions based on the portfolio's eligible assets only (which are listed equity and credit holdings, where applicable). The energy exposure metrics are calculated based on the revenue generated from these activities by the underlying investee companies and weighted by the fund's holdings. Fund exposure to 'Coal' represents Thermal Coal mining and reflects investments in companies whose coal-related revenues are below the accepted threshold. Please refer to the fund sustainability disclosures for more details on exclusions. All metrics use reported company data. Where data may not be available, then MSCI may use estimates. Benchmark used is the MSCI World (Net Total Return) index.

Adverse Impacts

The table below shows some adverse impacts of this fund and its benchmark, where applicable. The indicators referred to below aim to show the negative effects that investment decisions, made in respect of the fund's portfolio, have on certain sustainability factors, such as environmental, social and employee matters. We also identify the coverage, which refers to the percentage of indicator data available at month-end for the underlying holdings of the fund and the benchmark, where applicable.

Category	Indicator	Description	Units	Fund	Benchmark
People	Board Gender Diversity	Average ratio of female to male board members in investee companies	Ratio (%)	68.1% Coverage*: 100.0%	56.9% Coverage*: 99.7%
	UNGC and OECD principle policies	Share of investment in companies without policies to monitor compliance with UNGC and OECD principles	Ratio (%)	32.0% Coverage*: 100.0%	53.0% Coverage*: 99.7%
	UNGC and OECD principle violators	Share of investments in companies that have been involved in violations of UNGC and OECD principles	Ratio (%)	0.0% Coverage*: 100.0%	0.4% Coverage*: 99.8%
Planet	Non-renewable energy exposure	Share of non-renewable energy consumption and production	Ratio (%)	71.2% Coverage*: 70.1%	59.3% Coverage*: 73.3%
	Exposure to companies without carbon emissions reduction initiatives	Investing in companies without carbon emission reduction initiatives aligned with the Paris Agreement	Ratio (%)	16.0% Coverage*: 100.0%	27.4% Coverage*: 99.6%

Information relating to changes in fund manager, investment objective, benchmark and corporate action information

Please note that the fund's benchmarks were changed on 16 August 2021. The past performance in the above table is based on the fund's benchmarks (Target benchmark: FTSE Customised All-Share ex Ethically Screened (Gross Total Return) Index. Comparator benchmarks: FTSE All Share (Gross Total Return) Index and the MSCI UK Value (Gross Total Return) Index) in place prior to this date. Going forward, this table will show past performance from this date based on the new benchmarks (Target benchmark: MSCI World (Net Total Return). Comparator benchmarks: MSCI World Value (Net Total Return) Index and the Investment Association Global sector average return). The fund's objectives and investment policy were changed on 21.09.2023. Please note that this fund, previously named Schroders Institutional UK Specialist Value (PPFV), was converted into an Institutional AUT as of the 24.03.2006. On 14.02.2018 Schroders Institutional Specialist Value UK Equity Fund changed its name to Schroders Institutional Responsible Value UK Equity Fund. On 16.08.2021 Schroder Institutional Responsible Value UK Equity Fund changed its name to Schroder Global Sustainable Value Equity Fund.

Benchmarks: (If applicable)

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark. The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the fund aims to provide. The comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the benchmark. The investment manager will invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities.
