SEVEN VII IM Investment Management

INVESTMENT OBJECTIVE

The fund aims, by applying active asset allocation techniques to predominantly passive strategies, to provide a balance of income and capital appreciation. There may be some risk to capital.

INVESTMENT PROCESS

We aim to manage money to a targeted return over time so that you can plan. We do this by beginning with a historical analysis of asset class performance to produce a strategic asset allocation. This asset allocation is reviewed quarterly based on our assessment of how current economic, political and market driven events will affect the portfolio in order to achieve the targeted return with greater certainty. These investment decisions are implemented using only passive securities.

WHAT YOU NEED TO CONSIDER

In making your choice of investment you need to consider the level of risk you are prepared to take, how much growth you need to achieve, and over what time. In short, how much are you prepared to lose; are you a slow and steady investor or might you be comfortable taking more risk for the possibility of more return? If you have a long time to grow your investments you might be able to ride out market ups and downs better than someone who needs their money in just 5 years.

Risk is however not the only factor to consider. You should also regularly reassess the suitability of your investments to ensure that they continue to meet your investment goals and suit your time horizon. You should be aware that there can be no guarantees. The value of investments may go up and down and you may get back less than you invested originally.
