

# BNY Mellon Global Dynamic Bond Fund

## INVESTMENT MANAGER

Newton Investment Management: Newton aims to deliver outcomes for its clients across active equities, income, absolute return, multi-asset, thematic and sustainable strategies. Its capabilities are driven by its global investment research platform which harnesses a breadth of both fundamental and quantitative research.

## INVESTMENT OBJECTIVE

To maximize the total return from income and capital growth by investment primarily (meaning at least three-quarters of the Fund's total assets) in a globally diversified portfolio of predominantly corporate and government fixed interest securities. However, a positive return is not guaranteed and a capital loss may occur.

## PERFORMANCE BENCHMARK

The Fund will measure its performance against SOFR (30-day compounded) + 2% per annum (the "Cash Benchmark"). The Cash Benchmark is used as a target against which to measure its performance over 5 years before fees. SOFR (the Secured Overnight Financing Rate) is a broad measure of the cost of borrowing cash overnight collateralised by U.S. Treasuries and is administered by the New York Federal Reserve. The Fund is actively managed, which means the Investment Manager has discretion over the selection of investments, subject to the investment objective and policies disclosed in the Prospectus.
