

M&G North American Dividend Fund Sterling Class I – Income shares

Monthly Fund Review as at 31 March 2024

For investment professionals only

Highlights

- Global equities extended gains, with Europe leading the rally. The US outperformed albeit with mixed results from the major indices. For the fund, Cogent Communications led the detractors. Equinix, a data centre company structured as a real estate investment trust (REIT), was another notable laggard. Visa and Mastercard, our conviction positions in digital payments, moved sideways in a rising market. The underweight position in NVIDIA and the zero exposure to Alphabet also held back relative performance, although the negative effect was mitigated by not owning Apple and Tesla.
- We bought AbbVie in healthcare, and completed the sale of KLA Corp and VF Corp in technology and consumer discretionary, respectively. We also divested Costco Wholesale and NVIDIA after their strong run.
- Dividends continued on a positive footing, with a surprise increase from JPMorgan Chase, which raised its dividend for the second time in a year. Our core holding in banks raised its dividend by 10% from the previous quarter.

The main risks associated with this fund

For any past performance shown, please note that past performance is not a guide to future performance.

The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

The fund holds a small number of investments, and therefore a fall in the value of a single investment may have a greater impact than if it held a larger number of investments.

The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.

Further risk factors that apply to the fund can be found in the fund's Prospectus.

Single year performance (5 years)

	2023	2022	2021	2020	2019
Sterling I Income	17.0%	-4.7%	30.5%	10.1%	26.1%

Performance comparison: The benchmark is a target which the Fund seeks to outperform. The index has been chosen as the fund's target benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction. The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.

ESG Standard Glossary

Additional ESG specifications: In the context of M&G, these are funds managed with an explicit ESG objective, outcome or in accordance with specific ESG criteria, and will have a number of minimum exclusions in place.

Engagement: Interaction with company management on various financial and non-financial, including ESG, issues. Engagement allows investors to better understand how a company is undertaking its operations and how it is interacting with its stakeholders, as well as advising on and influencing company behaviour and disclosures where appropriate.

ESG integration: Describes the explicit and systematic inclusion of Environmental, Social and Governance factors in investment analysis and investment decisions. It underpins a responsible investment approach, and allows investors to better manage risk and generate sustainable, long-term returns.

Exclusions: The exclusion or restriction of investments based on the sector in which they operate, the products or services they provide or for other specific criteria, i.e. they are deemed to be in breach of the United Nations Global Compact principles on human rights, labour the environment and anti-corruption.

Voting: As the partial owners of a company, shareholders have the right to vote on resolutions put forward at a company's annual general meeting. These resolutions include the re-election of directors, executive remuneration and business strategy, among others, and may include resolutions put forward by shareholders.

Explanation of our climate metrics

The Weighted Average Carbon Intensity (WACI) is the metric used to report our funds' carbon emissions. It is a measure of how much CO2 is being emitted per US\$ million of sales by each company that the fund invests in. This can be used to determine the likely effect a company is having on the environment. It can also help to compare the impact different companies have on the environment, and to compare companies against the broad market or the financial benchmark for the fund. However, this metric does not take into account the difference in carbon characteristics among sectors.

The WACI metric is one of many greenhouse gas emissions data points, each offering a different aspect of analysis on climate impact. M&G have selected this metric as it is applicable to multi-asset, equity and fixed income funds and it is aligned to the recommendations from the Taskforce for Climate Related Financial Disclosures (TCFD). It has also been chosen to align with M&G's groupwide target of transparency when it comes to the disclosure of climate emissions.

At M&G we currently use MSCI as our main third-party data provider for carbon intensity data as we consider its coverage to be the broadest of the current providers. As with any mass data collection, there are methodology limitations; this also applies to MSCI. We make every effort to check its data and are currently building our own tools which will use a variety of data sources to gather and map the carbon emissions of our funds.

For the avoidance of doubt, this fund is not managed to a carbon emission objective and, the benchmark WACI (should funds have a benchmark) has been included for information purposes only.

Important information

With effect from November 2023, we are reporting using our internal accounting book of record (ABOR) moving away from the investment book of record (IBOR) used for reporting up to October 2023. The fund originally launched on 18 December 1972 as the M&G American Fund. On 28 April 2015, the fund's name and objective changed and it is now called the M&G North American Dividend Fund and we are choosing to use this date as the launch date for this fund . Therefore the past performance shown before this change was achieved under circumstances that no longer apply. The Fund changed its name and objective on 28 April 2015.

The M&G North American Dividend Fund is a sub-fund of M&G Investment Funds (1).
