

JOHCM UK Equity Income Fund

Fund overview

- The Fund aims to generate long-term capital and income growth through active management of a portfolio of UK listed equities
- Established income investors James Lowen and Clive Beagles abide by a strict dividend yield discipline, which leads to an emphasis on higher-yielding stocks and promotes a naturally contrarian style
- The Fund will typically have significant exposure to small and mid-cap stocks, often giving the portfolio a different holdings profile to many other income funds
- Benchmark: FTSE All-Share Total Return Index
- The use of the Index does not limit the investment decisions of the fund manager; the shareholdings of the Fund may therefore differ significantly from those of the Index
- Please see the [Prospectus/KIID/KID](#) for further information. Please ensure you read and understand these documents before making an investment and wherever possible obtain professional advice

The value of an investment and the income from it can fall as well as rise as a result of market and currency fluctuations and you may not get back the amount originally invested. For further information on risks please refer to the Fund's KIID and/or the Prospectus. The Fund's investment include shares in small-cap companies and these tend to be traded less frequently and in lower volumes than larger companies making them potentially less liquid and more volatile. The annual management charge is deducted from the capital of the Fund. This will increase the income from the Fund but may constrain or erode potential for capital growth.

NAV of Share Class A in GBP, net income reinvested, net of fees. The A Acc GBP Class was launched on 30 November 2004. Performance of other share classes may vary and is available on request.

*Annualised since launch. **Refers to the fund's ranking in a peer group of funds made up from all funds classified as UK Equity Income by the Investment Association (IA).
