

Aberdeen European High Yield Bond Fund

I Acc

Performance Data and Analytics to 30 June 2019

Objectives and investment policy

Objective: To generate income and increase the value of the shareholder's investment over the long term (income and capital growth).

Investment policy: The Fund invests 70% or more of its total net assets in sub-investment grade bonds issued by companies, governments and other organisations based in the UK or other European countries.

Performance Data: Share Class I Acc

Source: Lipper. Basis: Total return, NAV to NAV, net of annual charges, UK Net Income Reinvested.

These figures are gross of an initial charge: to the extent that this is paid, it will reduce performance from that shown.

Past performance is not a guide to future results.

Fund manager's report

- European high yield bounced back with a return of 2.4%, the strongest monthly return since 2016.
- Central bank rhetoric was the key driver of the improvement in sentiment as both the US Federal Reserve and European Central Bank expressed their willingness to ease monetary policy if required, which the market interpreted as being highly likely in the near future.
- A truce in the trade war between the US and China, agreed at the G20 late in the month, was an important step towards a trade deal being agreed, with talks expected to resume imminently.
- Higher quality bonds outperformed lower-rated credits in the period, with BBs returning 2.5%, while Bs returned 2.1%.

Risk factors should be read in conjunction with all warnings and comments given in the prospectus for the fund. Please visit the attached link to our Jargon Buster which contains a glossary of terms used in this document > <http://glossary.aberdeen-asset.com/jargonbuster/>

Credit rating of holdings (%)	Fund	Benchmark	Difference
AA	0.1	-	0.1
BBB	6.8	2.4	4.4
BB	33.9	68.2	-34.3
B	44.8	26.6	18.2
CCC	9.1	2.7	6.4
CC or below	-	0.1	-0.1
Unrated	1.2	-	1.2
Cash	4.1	-	4.1
Total	100.0	100.0	

Cash includes cash at bank, outstanding settlements, call account cash, fixed deposits, cash used as margin and profit/losses on both derivative positions and forward currency contracts. Where bonds are split rated between two or more of S&P, Moody's and Fitch, the data shown takes a more conservative approach, splitting lower. This may not be consistent with the arrangement agreed in the prospectus, which may detail taking a higher rating where there is a split. In the absence of any agency ratings an internal Fund Manager rating may be applied. The benchmark shown reflects ratings from S&P, Moody's and Fitch only. This may differ from the ratings used by the benchmark provider detailed in the prospectus.

Source: Simulated Ongoing charges Aberdeen Standard Investments as at 1 December 2018.

^BThe Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the Funds. It is made up of the Annual Management Charge (AMC) of 0.70% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the Funds. The Ongoing Charges figure can help you compare the annual operating expenses of different Funds. Analytics provided by The Yield Book® Software

Important information

Risk factors you should consider before investing:

- The value of investments and the income from them can go down as well as up and investors may get back less than the amount invested.
- Exchange rates: The Fund may have holdings which are denominated in different currencies and may be affected by movements in exchange rates. Consequently, the value of the Fund's investments and the income from them may rise or fall in line with exchange rates.
- Bonds: Bond valuations are affected by changes in interest rates, inflation and the creditworthiness of the bond issuer. There is a risk that a bond issuer may not be able to repay the money they borrowed nor make their required interest payments. This risk increases for bonds with lower credit ratings. Where a bond market has a low number of buyers and/or a high number of sellers, it may be harder to sell particular bonds at an anticipated price and/or in a timely manner.
- A full list of risks applicable to this Fund can be found in the Prospectus.

Other important information:

The Fund is a sub-fund of Aberdeen Investment Funds ICVC, an authorised open-ended investment company (OEIC). The Authorised Corporate Director is Aberdeen Standard Fund Managers Limited. Nothing herein constitutes investment, legal, tax or other advice and is not to be relied upon in making an investment or other decision. No recommendation is made, positive or otherwise, regarding individual securities mentioned. This is not an invitation to subscribe for shares in the Fund and is by way of information only. Subscriptions will only be received and shares issued on the basis of the current Prospectus, relevant Key Investor Information Document (KIID) and Supplementary Information Document (SID) for the Fund. These can be obtained free of charge from Aberdeen Standard Fund Managers Limited, PO Box 9029, Chelmsford, CM99 2WJ.

Aberdeen Standard Investments is a brand of the investment businesses of Aberdeen Asset Management and Standard Life Investments.

Issued by Aberdeen Asset Managers Limited which is authorised and regulated by the Financial Conduct Authority in the United Kingdom.

^AThe Distribution Yield reflects the amounts that may be expected to be distributed over the next twelve months as a percentage of the mid-market share price of the fund as at the date shown. The Underlying Yield reflects the annualised income net of expenses and known irrecoverable withholding tax of the fund (calculated in accordance with relevant accounting standards) as a percentage of the mid-market share price of the fund as at the date shown. Both yields are based on a snapshot of the portfolio on the month-end date and are not guaranteed and actual distributions received (where a share class pays distribution) may be higher or lower than the amount stated. They do not include any initial charges and Investors may be subject to tax on distributions. The Distribution Yield is higher than the Underlying Yield because a portion of the fund's expenses are charged to capital. This has the effect of increasing distributions and constraining the fund's capital performance.
