

ASI Global Inflation-Linked Bond Fund

Platform 1 Acc GBP

31 October 2021

Objective

To generate income and some growth over the long term (5 years or more) by investing in inflation-linked bonds.

Performance Target: to achieve the return of the Bloomberg World Government Inflation Linked Index (Hedged to GBP), plus 0.5% per annum (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target. The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

Portfolio securities

- At least 70% of the fund will be invested in inflation-linked government bonds issued anywhere in the world.
- The fund may also invest in inflation-linked and non-inflation-linked investment grade corporate bonds and sub-sovereign bonds issued anywhere in the world. The fund will employ techniques to reduce (hedge) risk related to currency movements on non-Sterling bonds.
- The fund may also invest in other funds (including those managed by Aberdeen Standard Investments) and money-market instruments, and cash.

Benchmark history: Performance comparator/Portfolio constraining benchmark - Bloomberg World Government Inflation Linked (Hedged to GBP)

Source: abrdn (Fund & Benchmark) and Morningstar (Sector). Basis: Total Return, NAV to NAV, UK Net/Gross Income Reinvested.

"Fund (Net)" refers to the actual unit price performance of the shareclass shown; "Fund(Gross)" adds back charges such as the annual management charge to present performance on the same basis as the performance target / performance comparator / portfolio constraining benchmark. These figures do not include the initial charge; if this is paid it will reduce performance from that shown.

Past performance is not a guide to future returns and future returns are not guaranteed.

Risk and reward profile

This indicator reflects the volatility of the fund's share price over the last five years. See Key Investor Information Document (KIID) for details.

Key risks

- The value of investments and the income from them can fall and investors may get back less than the amount invested.
- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.

Management process

- The management team use their discretion (active management) to identify investments after analysing global economic and market conditions (for example, interest rates and inflation) in addition to analysing of individual bonds and derivatives.
- In seeking to achieve the Performance Target, the Bloomberg Barclays World Government Inflation Linked Index (Hedged to GBP) is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 1.5%. Due to the Fund's risk constraints, the intention is that the Fund's performance profile will not deviate significantly from that of the Bloomberg Barclays World Government Inflation Linked Index (Hedged to GBP) over the longer term.

(d) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
