

Investment Objective

The TM Fulcrum Diversified Core Absolute Return Fund aims to achieve long-term absolute returns of inflation + 3% to 5% p.a. in all market conditions over rolling five year annualised periods, with lower volatility than equity markets. In doing so the Fund aims to achieve a positive return on a rolling three year basis.

Performance

The track record shown represents the net total return from three different time periods, denoted by dotted lines. 1) From 16/09/08 until 31/03/12 performance represents the Fulcrum Diversified Absolute Return strategy - source Fulcrum Asset Management LLP. 2) From 01/04/12 to 28/11/14 the TM Fulcrum Diversified Absolute Return Fund Class C GBP. 3) From 01/12/14 the TM Fulcrum Diversified Core Absolute Return Fund Class C GBP. NAV source third party administrator. TM Fulcrum Diversified Core Absolute Return Fund differs from the historic track record shown above in time periods 1 and 2 due to exclusion of investments in third party funds which have typically represented circa 10-20%. Aside from this, the strategies are managed on a pari passu basis. Past performance is not a guide to future performance and future returns are not guaranteed. This Fund cannot be purchased by US investors.

Market commentary

March saw a continuation of recent trends, with a further improvement in market sentiment alongside an acceleration in global economic activity.

In the US, inflation remained higher than expected, with strong data on household consumption, private investment, and business confidence. Federal Open Market Committee (FOMC) officials maintained a generally dovish tone, expressing some concern at recent inflation readings and emphasizing that strong growth gives space to delay cuts if necessary. Expectations for rates remained consistent with three 25bps cuts this year.

In Europe, policymakers faced a more benign inflation outlook alongside substantially weaker economic activity, leading European Central Bank (ECB) officials to talk of swiftly reducing interest rates. Similarly, members of the UK's Monetary Policy Committee (MPC) adopted a more accommodative stance.

Meanwhile, officials at the Bank of Japan (BoJ) raised overnight rates from -0.1% to 0%, ending eight years of negative interest rates. After months of weak growth, China saw signs of a rebound in economic activity, with stronger industrial output, manufacturing sentiment and exports.

Against this backdrop, global equities and bonds rose on the month, while a continued divergence in US economic activity and market interest rates helped to strengthen the US dollar. With a general improvement in global growth sentiment, commodities were also up strongly, led by precious metals but with gains in energy, metals, and agricultural goods as well.

Performance commentary

The fund posted a positive performance of 3.0% in March, with gains spanning Dynamic Asset Allocation (DAA), Discretionary Macro (DM) and Diversifying Strategies (DS).

Within Dynamic Asset Allocation, gains were led by a long exposure to equities and commodities, with a small addition from fixed income. Diversifying Strategies also saw gains, with trend-following strategies successfully capturing trends in equities and currencies.

Turning to Discretionary Macro, holding precious metals, particularly gold, was a boost to the performance of the Commodities sleeve, despite the drag from a short oil position. We also saw gains from our short euro and Sterling positions in Currencies as the US dollar rallied on the back of inflationary surprises in the US.

The Volatility strategy was buoyed by strong performance in relative value volatility, and there were small gains from the S&P call ratio and equity dispersion views. The European dividends strategy and intraday momentum detracted slightly from returns.

Holdings of Japanese equities and Japanese banks were once again additive in March, while a position in European defence stocks was a further boost to Cross Asset positions. Equity Thematic ended the month slightly up, with gains from a long position in AI supply chain semiconductors versus short analogue semiconductors, and also from our defence spending theme, although there were some losses from our long software exposure.

Fixed Income was broadly flat on the month as gains from long gilt positions offset the losses made on our long US rates positions and the Dynamic Convexity strategy was challenged by persistently low volatility.

Positioning & Outlook

In Dynamic Asset Allocation, the equity allocation has increased amid declines in volatility, while strong global growth and supportive policy conditions have driven the commodities allocation higher. Fixed income duration remains unattractive given the inverted yield curve, growth and inflation.

The exposure to equities in the Trend component of Diversifying Strategies has moved towards the upper end of its historical range, leading us to introduce a discretionary hedge in the broader portfolio against large equity market declines.

In Discretionary Macro, we have moved to a neutral stance on duration in Fixed Income, with negative exposure to the short end of the yield curve in the US, short duration in Japan, and a positive exposure to long-dated UK Gilts.

We maintain a long US dollar bias expressed across several different markets, with short positions in the euro and the Chinese renminbi, where we anticipate a widening interest-rate differential versus the US.

Within the Commodities sleeve, we have trimmed back our holdings of precious metals. We maintain our short position in long-dated oil, preferring to hedge against geopolitical risk via the dollar due to the potential for oversupply within the physical crude market.

We maintain our positive stance on Japanese equities, with a weaker yen also providing additional support to domestically-listed exporters. We have a particular focus on Japanese banks, where the reflationary environment and resulting yield curve steepening should raise loan profitability.

We continue to make opportunistic use of options-based hedging strategies designed to protect against monetary policy or supply shocks.

Overall, we hold slightly above average equity exposure, but remain nimble in our positioning, with significant diversification across strategies as well as hedging against emergent risks.

Risk Summary

Leverage techniques may be used by the fund. A relatively small price movement in an underlying asset may amplify losses and the fund may be exposed to losses which are greater than the initial amount invested. Any derivatives usage can result in substantial losses to the fund where expectations as to how a derivative will perform prove to be incorrect or inefficient, or in adverse market conditions. Losses may occur if an organisation through which the fund transacts becomes insolvent or fails to meet its obligations. This risk may be reduced by obtaining assets as collateral from these organisations. For a full explanation of specific risks and the fund's overall risk profile, as well as all its share classes, please refer to the Prospectus, available on the firm's website.

Certain transactions, including those involving futures, options and high yield securities and investments in emerging markets may give rise to substantial risk and may not be suitable for all investors. Foreign currency denominated investments are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of, or income derived from, the investment; such investments are also subject to the possible imposition of exchange control regulations or other laws or restrictions applicable to such investments. Investments referred to in this material are not necessarily available in all jurisdictions, may be illiquid and may not be suitable for all investors. Investors should consider whether an investment is suitable for their particular circumstances and seek advice from their investment adviser.

This document is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation. In particular this document is not intended for distribution in the United States or for the account of U.S. persons (as defined in Regulation S under the United States Securities Act of 1933, as amended (the "Securities Act")) except to persons who are "qualified purchasers" (as defined in the United States Investment Company Act of 1940, as amended), "accredited investors" (as defined in Rule 501(a) under the Securities Act) and Qualified Eligible Persons (as defined in Commodity Futures Trading Commission Regulation 4.7).

Switzerland: The offer and marketing of interests of the fund in Switzerland will be exclusively made to, and directed at, qualified investors (the "Qualified Investors"), as defined in Article 10(3) of the Swiss Collective Investment Schemes Act ("CISA") in conjunction with Art. 4(4) of the Swiss Federal Act on Financial Services ("FinSA"), i.e. institutional clients, at the exclusion of professional clients with opting-out pursuant to Art. 5(3) FinSA ("Excluded Qualified Investors"). Accordingly, the fund has not been and will not be registered with the Swiss Financial Market Supervisory Authority ("FINMA") and no representative or paying agent have been or will be appointed in Switzerland. This document and/or any other offering or marketing materials relating to the interests of the fund may be made available in Switzerland solely to Qualified Investors, at the exclusion of Excluded Qualified Investors.

The Shares have not been and will not be registered pursuant to Article 4, Paragraph 1 of the Financial Instruments and Exchange Law of Japan (Law no. 25 of 1948, as amended) and, accordingly, none of the Shares nor any interest therein may be offered or sold, directly or indirectly, in Japan or to, or for the benefit, of any Japanese person or to others for re-offering or resale, directly or indirectly, in Japan or to any Japanese person except under circumstances which will result in compliance with all applicable laws, regulations and guidelines promulgated by the relevant Japanese governmental and regulatory authorities and in effect at the relevant time. For this purpose, a "Japanese person" means any person resident in Japan, including any corporation or other entity organised under the laws of Japan.

For EU Investors: As at the date of this document, the fund has not been approved, notified or registered in accordance with the Alternative Investment Fund Managers Directive (Directive (2011/61/EU) (the "AIFMD") for marketing to professional investors in any member state of the EEA (each a "Relevant State"). However, such approval may be sought, or such notification or registration may be made in the future. Therefore, this document may only be transmitted to an investor in a relevant EU Member State at such Investor's own initiative.
