Fund objective and policy

The Fund aims to deliver capital and income appreciation. The Fund is actively managed and not managed with reference to a benchmark. The Fund will seek to achieve this investment objective primarily through investment in and/or exposure to a combination of investments in UK commercial property and securities of property and property related issuers listed or operating in the countries of the European Union and/or the European Economic Area. While the securities in which the Fund invests will mainly be equities, investment may also be made in fixed interest securities. The Fund may use derivatives for investment purposes, as well as for efficient portfolio management to maintain, increase or reduce exposure to particular securities or market indices. Such derivatives may include, but will not be restricted to, swaps, contracts for difference, forward currency contracts and financial futures and options.

Risk warning

The value of investments and any income derived from them can go down as well as up as a result of market or currency movements and investors may not get back the original amount invested. The value of directly held property reflects the opinion of valuers and is reviewed periodically. Investments which are concentrated in a specific sector or country may result in less diversification and hence more volatility in investment values. An investment concerns the acquisition of units or shares in a fund, and not underlying assets such as buildings or shares of a company, as these are only the underlying assets owned by the fund. The decision to invest in the promoted fund should also take into account all the characteristics or objectives of the promoted fund as described in the prospectus. Full list of relevant risks can be found in the KIID/KID and prospectus.
